malibu boats
TWO THOUSAND SIX

"Getting something done is an accomplishment; getting something done right is an achievement." -Anonymous

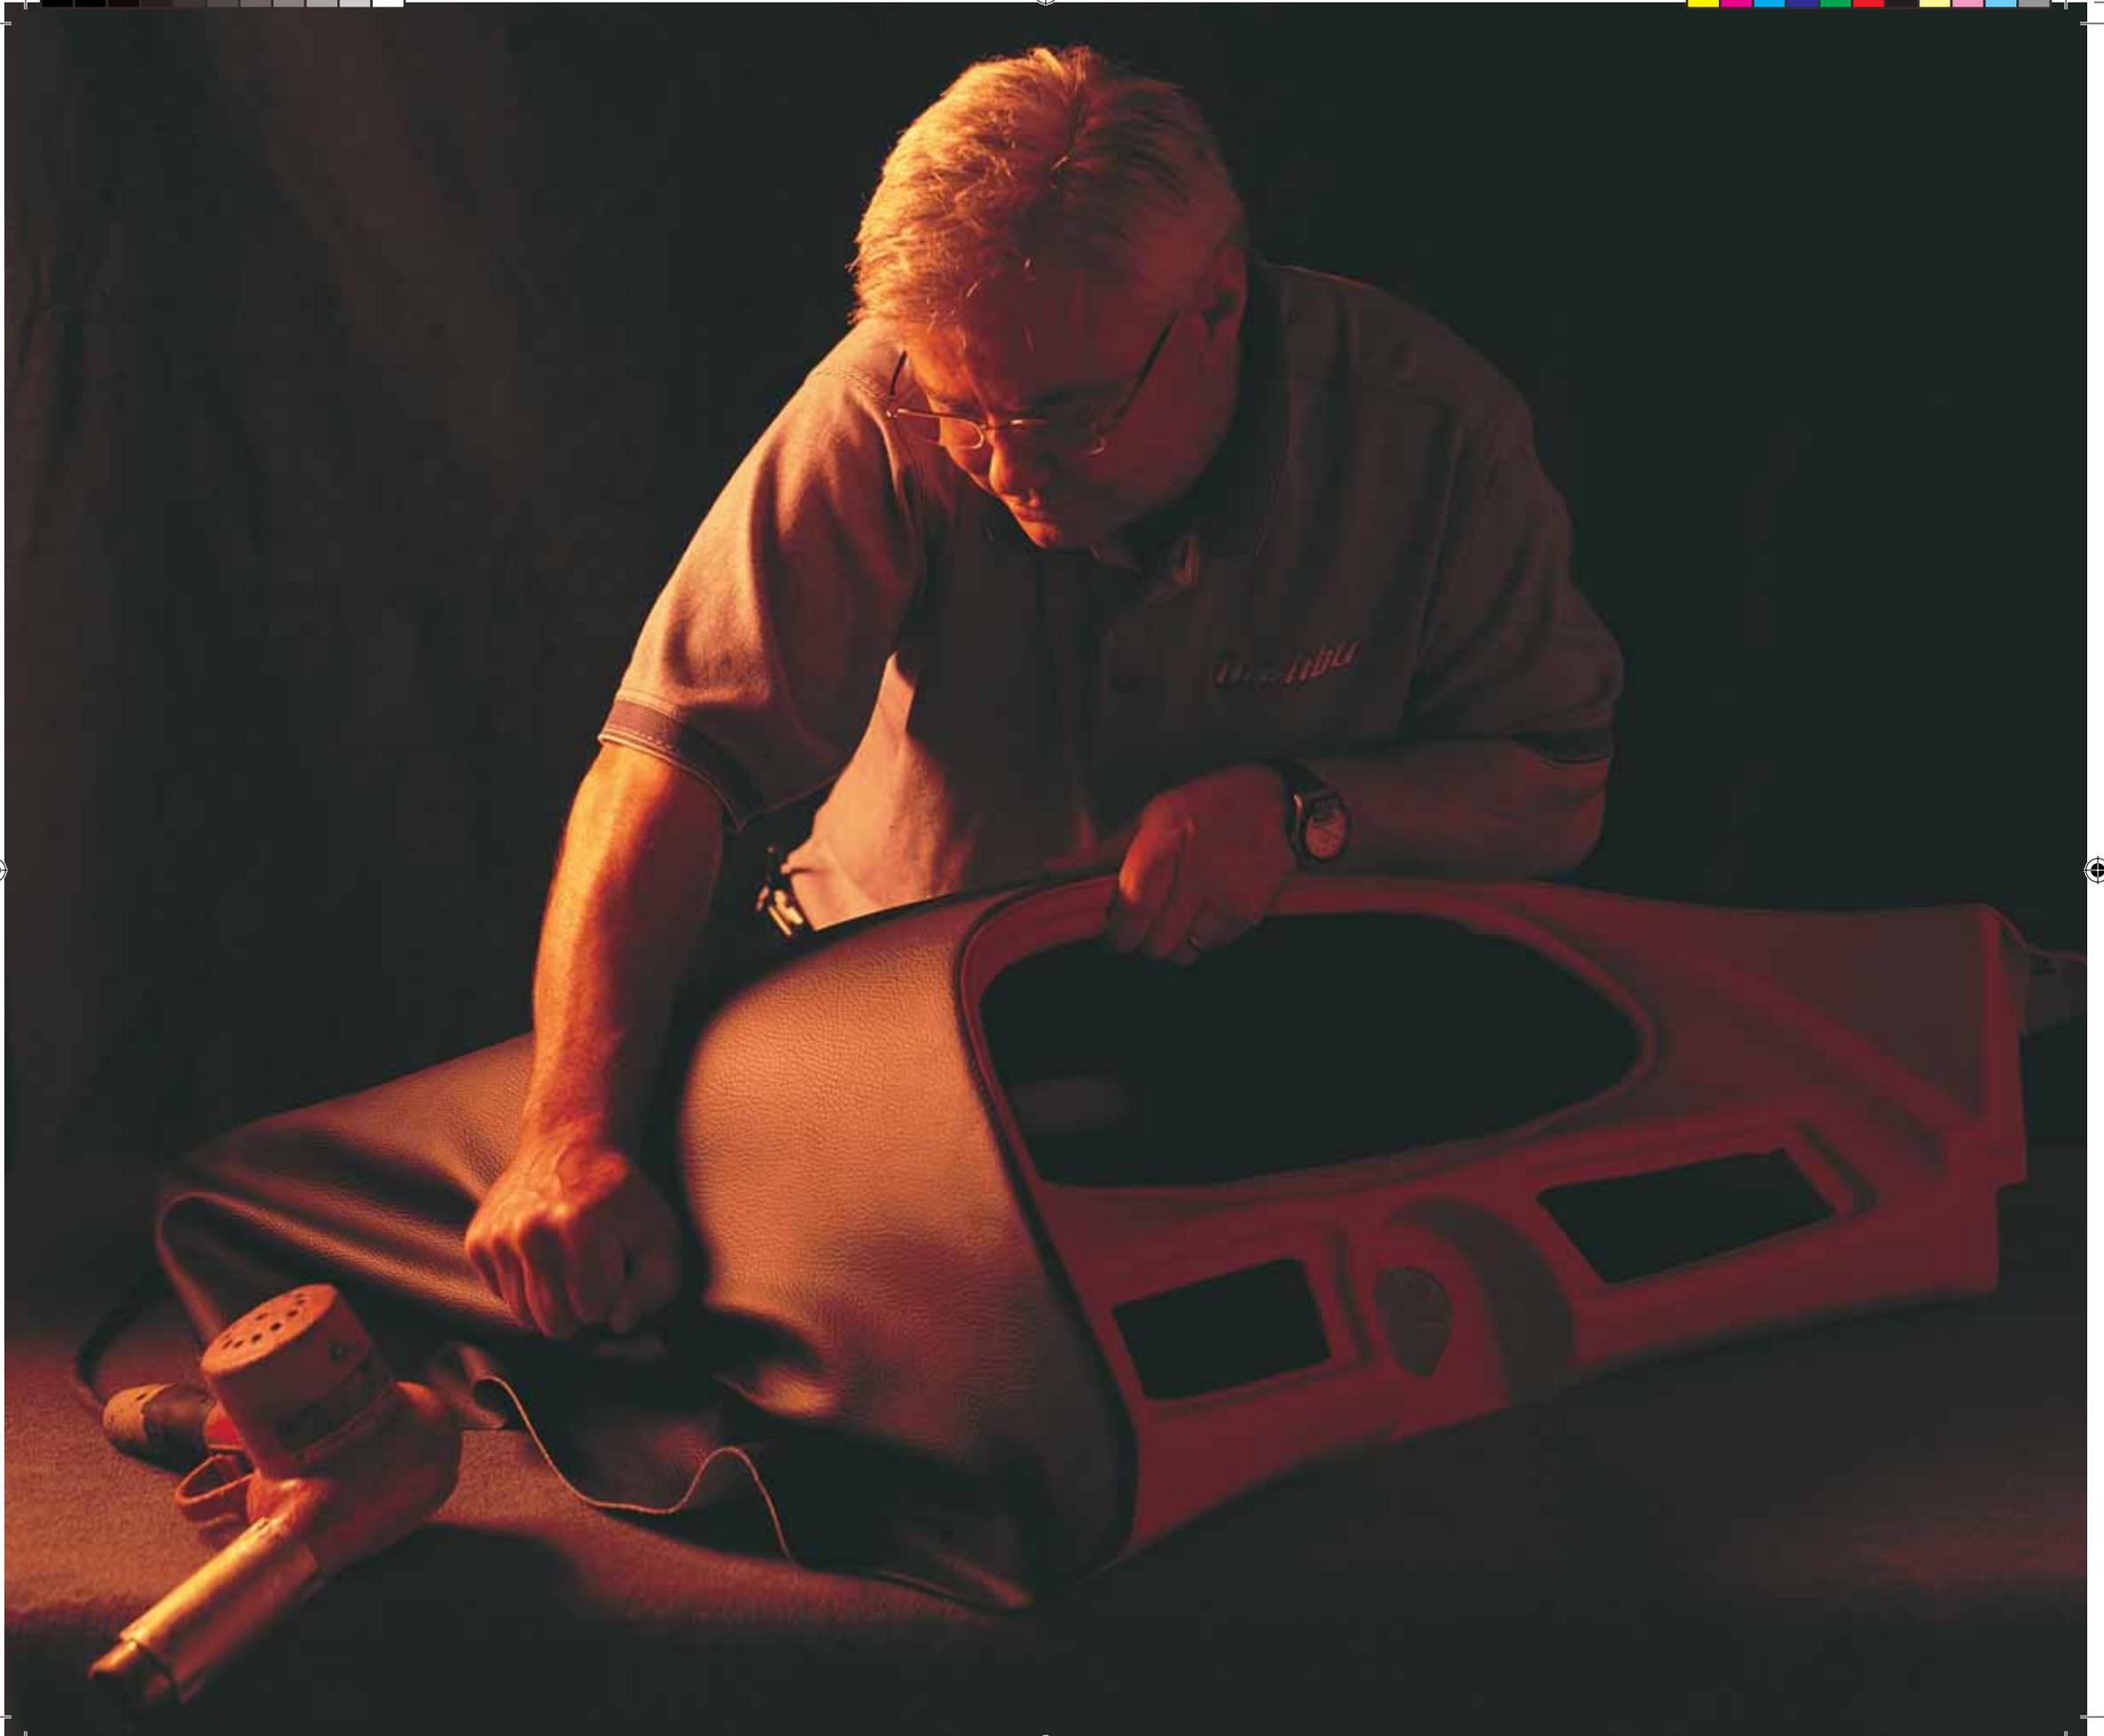

What is a Malibu?

Dreams fulfilled. That's what we do best—for our customers, our employee owners, for the entire water sports industry. Our enthusiasm and creativity is manifested in our boats. We love introducing innovations, such as the Wedge, Multi-Port Fuel Injected engines, Gorilla fins and more. We are global in our reach—with manufacturing plants in Tennessee, California and Australia. We are personal in our approach—actively supporting grass roots tournaments, national competitions and professional tournaments everywhere. It all contributes to making Malibu the number one selling, most awarded water sports boat in the world.

Before the
cork hits the
ground, we're
thinking about
the next one.

We are extremely proud and honored by every Boat Of The Year Award we have received. But no sooner had the congratulatory hugs been given for the 2005 award, than our engineers were back to work dreaming up the next great Malibu boat. Such is the relentless devotion to excellence of Malibu's Research and Development team. Four consecutive Boat Of The Year Awards in as many years prompted self-induced pressure to out-do themselves yet again, to continue the dynasty that has seen Malibu win more Product Excellence Awards and set more World Record performances than all of our competitors combined.

6

Malibu. Covering the world of water sports.

With manufacturing plants in both hemispheres, Malibu's reach is truly global. Our view is global too, that's why we support water sports everywhere—from the Wakeboard Worlds in Australia, to Wakestock in Canada and the U.S. Nationals and Malibu Open in the United States and supply the Official towboats of Cypress Gardens and the Tommy Bartlett Show. We are the number one selling boat in Canada, Europe, Australia, Mexico and the United States. Our dealers can be found throughout the world, in Russia, Germany, Japan, Mexico, Australia, United Kingdom, France, Denmark, Sweden, Switzerland and South Korea, among others. Malibu—extending the reach of water sports everywhere.

Redefining standards

one. Precision Pro Speed Control All 2006 Malibu boats feature world class speed control. Malibu Precision Pro Speed Control delivers, from low speed surfing and boarding disciplines to crisp, steady slalom speeds.

two. Hand-Wrapped Dashes Quality materials and hand-wrapped dashes are more than a styling enhancement. They are indicative of the detailed craftsmanship built into every Malibu.

three. Gorilla Tracking Fins Malibu's Gorilla fins enhance the handling stability and tracking capabilities of Sport-V configured boats. Larger surface areas and a more stable center pivot point increase the boat's overall dynamics and provide direct drive maneuverability.

four. Issotta Steering Wheel and Throttle Knob The Issotta steering wheel and chrome throttle knob add a flourish of Italian design and are standard in most Malibu models.

five. Driver's Swivel Seat and Adjustable Lumbar Support The driver's seat, featuring multi-density foam for extra comfort, can swivel around without a side panel obstructing it—another feature that separates Malibu engineers from others. Includes an exclusive, adjustable lumbar support.

six. Adjustable Rudder Another first introduced by Malibu is the ability to fine tune the rudder for a personal preference on rudder torque. The adjustable rudder is standard on every Malibu boat.

seven. Fiberglass Swim Platform with Fin Saver An available option on every Malibu boat, the fiberglass swim platform features a built-in rocker to keep ski and wakeboard fins safely off the platform.

eight. Billet Dash Insert Every 2006 Malibu features a billet dash insert surrounding the ergonomically-designed gauge layout. Machined from solid stainless steel, the billet insert adds that distinctive Malibu touch.

nine. One-piece Windshield and Stainless Top Cap The post-less molded windshield and stainless top cap enhance the dramatic, flowing lines of the Malibu deck designs by eliminating obstructing support pieces and aiding visibility.

ten. Dual Gas Fills Dual gas fills emptying into one central tank are standard on every Malibu boat for a more convenient refueling experience.

eleven. Patented Swivel-Head Pylon Malibu's patented swivel-head pylon rotates on precision bearings. The seamless rotation eliminates ratcheting and rope wear for a smoother, safer tow and longer rope life.

twelve. Oval Bow Rails and Safety Handles All Malibu bow rails and safety grab handles have been designed with an oval shape for added safety and pleasing aesthetics.

The Malibu difference

thirteen. Compartmentalized Locking Glove Box Malibu locking glove boxes are equipped with a compartmentalized liner to keep personal items secure. They are also equipped with a 12VDC power point for items such as cell phone chargers.

fourteen. CNC Machined Propellers Each Malibu NiBrAl propeller has been CNC machined for perfect balance, resulting in higher overall performance. Malibu absorbs the cost difference because we know the benefits over cast propellers far outweigh our investment.

fifteen. Ballast Monitoring System (WVLX, W23LSV, W23XTi, W247LSV only) Malibu's industry-exclusive graphical information center monitors and displays the volume of each ballast tank, providing each rider with the ability to customize wakes for their own riding style.

sixteen. LED Interior Lighting Every Malibu interior is equipped with cabin and storage LED lighting for safety, ambiance and convenience for unloading passenger equipment at the end of the day.

What exactly is luxury? You'll know it when you see it.

Table. Malibu Sport-Vs and XTi Series boats come standard with a removable table outfitted with four high quality stainless cup holders, chosen for their durability over common plastic cupholders.

(Table not available on Ride Series.)

One glance, and Malibu's exquisite craftsmanship is immediately evident. Let your eyes feast on the perfect seam alignment, quality hand-wrapped dashes and throttle consoles. Note the seats, ideally angled for optimum comfort. Standard creature comforts abound, from huge locking rear storage compartments, insulated and removable ice chests, stowable four person table, indirect LED interior lighting to available high end stereo components from Kicker® and Sony®. It's clear every detail has been attended to, every element tuned to perfection.

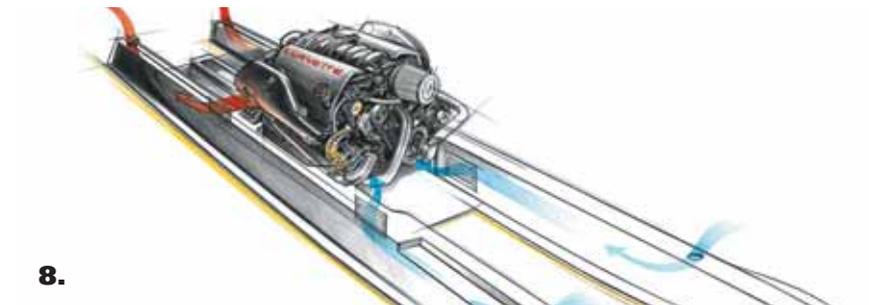

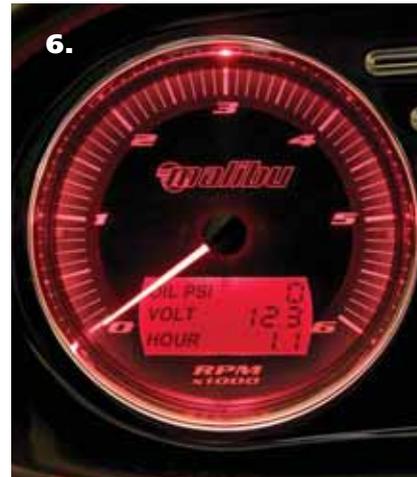

1-2. Malibu boats are the finest crafted and engineered boats on the water today. **(1)** Each Malibu begins with a meticulously sprayed 10-step ArmorCote gel coat process. It is then backed with an exclusive, pure vinyl ester barrier coat and 3 oz. skin coat prior to starting the complete **(2)** hand-laid fiberglass procedure. Additional steps provide increased protection, value and life for each Malibu boat.

3-6. **(3)** Malibu introduces ETC (Electronic Throttle Control) technology to each Malibu boat for 2006. Electronic Throttle Control eliminates cables and the associated binding, for extremely smooth throttle response. **(4)** Every Malibu boat shines with the use of high quality stainless steel components in every facet of production. **(5)** Malibu's patented swivel-head pylon incorporates needle bearings in the head for a smooth pivoting motion, eliminating rope ratcheting for extended rope life and increased safety. **(6)** Malibu's new speedometer and tachometer gauges incorporate critical engine and safety information directly into the gauge for data collection at a glance.

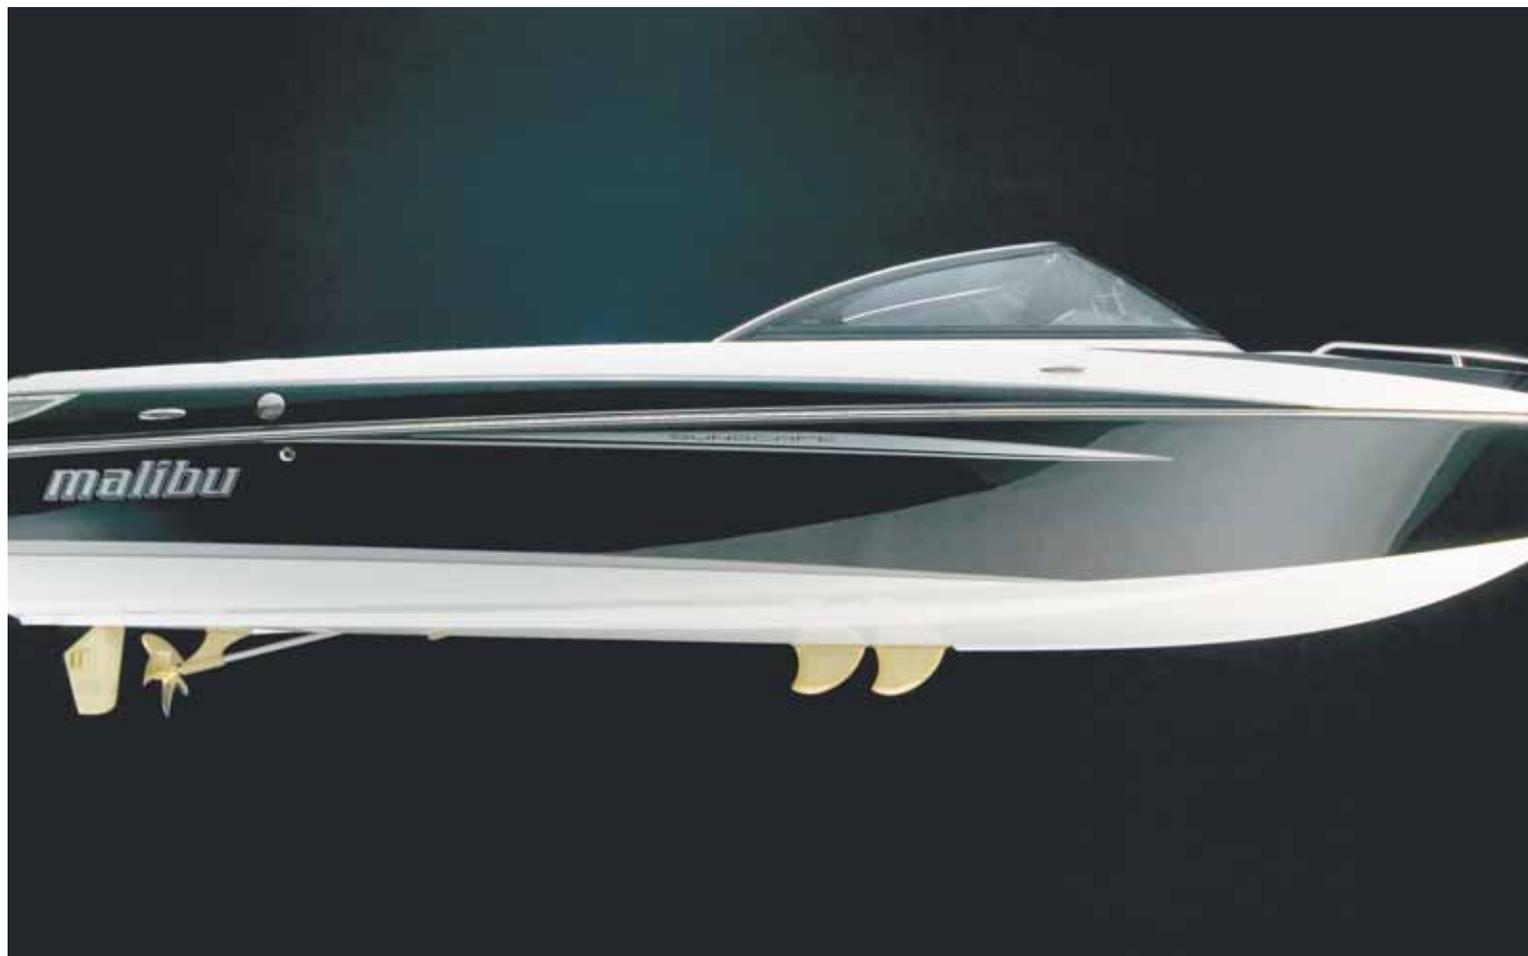

7-9. **(7)** Shhhhhh. Malibu boats are the quietest in the water sports industry. Meticulous engineering and design, incorporating Malibu Sound Suppression Technology in hull laminates, plus our unitized hull and deck construction make our boats stronger and quieter. Procedures in the construction process assist to separate noise and passengers from one another. **(8)** Malibu's patented Fiberglass Engine Chassis System (FibECS) allows for the engine to be through-bolted and the load to be dispersed over a greater area, for a more durable foundation, less vibration and quieter operation. **(9)** Malibu's composite Mantex flooring system, with a natural sound dampening quality, provides an indestructible foundation.

10-11. (10) There is simply no comparison when it comes to Malibu craftsmanship, readily evidenced in the exquisite two-toned, hand-wrapped dashes. Malibu offers a myriad of color choices on their sport shrouds, enabling owners to stamp their individuality on each boat. Why settle for cheap vacuum-formed components when authentic crafted dashes exist from Malibu? **(11)** Malibu interior seat cushions are built for the rigors of marine use but provide plush, enduring comfort created by the 38 oz. G&T vinyl, triple density foam and quality French stitching which beautifully locks it all together.

What does your family value?

More power to the equation.

Malibu has consistently demonstrated a knack for innovation. We have partnered with Indmar Marine engines to customize our power offerings for the best performance on the water. This year, new developments with Indmar and Medallion Instruments will permit Malibu to feature Electronic Throttle Control (ETC) and Precision Pro Speed Control standard on every Malibu. Indmar has invested in the most advanced automation technology and computerized machining techniques adapted from the aerospace industry to manufacture the world's finest gasoline powered inboard marine engines. In their state-of-the-art facility they make subcomponents with an aircraft grade precision unmatched in the marine industry. Malibu/Indmar engines are built for the long run and we take pride in the quality of our product. Indmar was rated number one in a prestigious, industry-wide customer satisfaction survey.

Fuel Injection. Malibu was the first manufacturer to standardize Multi-Port Fuel Injection in every boat, providing customers the highest engine performance and value. It is the type of innovation that has powered Malibu to the top of the water sports industry and offers you the opportunity for the performance of a lifetime.

Hammerhead 383. The Hammerhead 383 (400 HP) is the most powerful 5.7L small-block V8 ever developed for inboard use. Its aggressive new appearance matches its 400 horsepower and 420 foot-pounds of torque. Capped with Malibu's exclusive intake plenum, it sports Indmar's high-flow multi-port induction system, GM's FastBurn aluminum heads and Indmar-spec cam with 1.6:1 roller rockers for less friction, more power.

340 Monsoon. The Monsoon 340 (340 HP) delivers out of the hole with 397 foot-pounds of torque. This customized version of GM's Vortec 5.7L is designed specifically for Malibu's performance hulls. The Indmar ETX one-piece tuned exhaust manifolds plus high-lift roller cam and free-breathing Vortec heads equal one of the most powerful, dependable small blocks ever built.

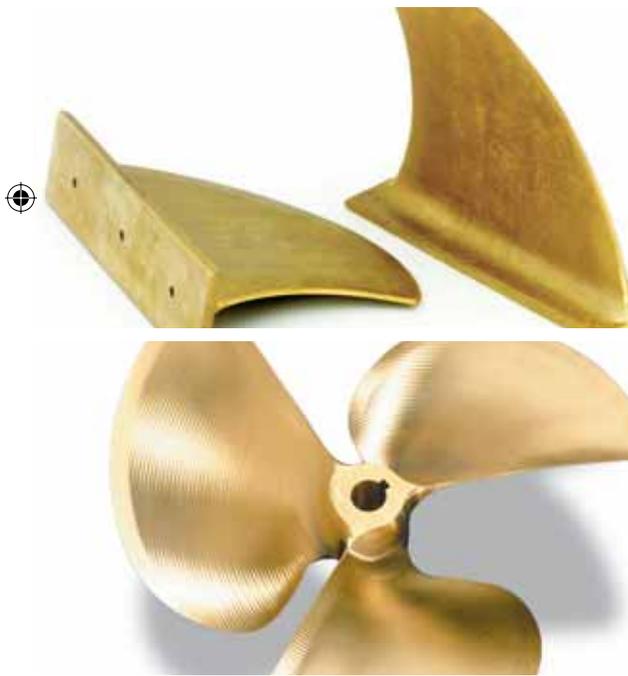

320 LCR. The 320 LCR (320 HP) is the multi-port fuel injected power-horse in Malibu's engine line-up. With 320 horses and 375 foot-pounds of torque, its core is the latest Delphi ECM (engine computer module) running the latest software, custom-calibrated by Indmar. The 320 LCR is programmed to deliver the power, turn-key starts, dependability and fuel efficiency that only Indmar's MPI delivers.

Vortec 8100. Vortec 8100 (425 HP) its 496 cubic-inch offers up to 450 horse power and 525 foot-pounds of torque. 9.1:1 high-compression Vortec heads turn out more usable power from every fuel charge. The MPFI aluminum intake manifold bolsters cylinder-to-cylinder airflow distribution for cleaner, more dependable combustion. Finely tuned plenum runners and the coil-near-plug ignition system (distributorless) enhance low-end torque and delivers awesome power.

Helping you achieve your personal best.

If you're not training behind a Malibu, you're going to lose to someone who is. Wakeboarding, slalom, barefooting—it's true across disciplines. That's the word on the water. But, don't take our word for it. You be the judge. Sit down, turn the key, throw the throttle forward and drive a Malibu. The conclusion is inescapable—this is the boat you have always dreamed of owning.

Gorilla Fins. Gorilla fins, standard on all Sport-V Malibus, offer greater tracking, stability and handling by virtue of their size and custom design.

CNC Propeller. Every Malibu is equipped with precisely machined CNC propellers for smoother operation and higher performance standards.

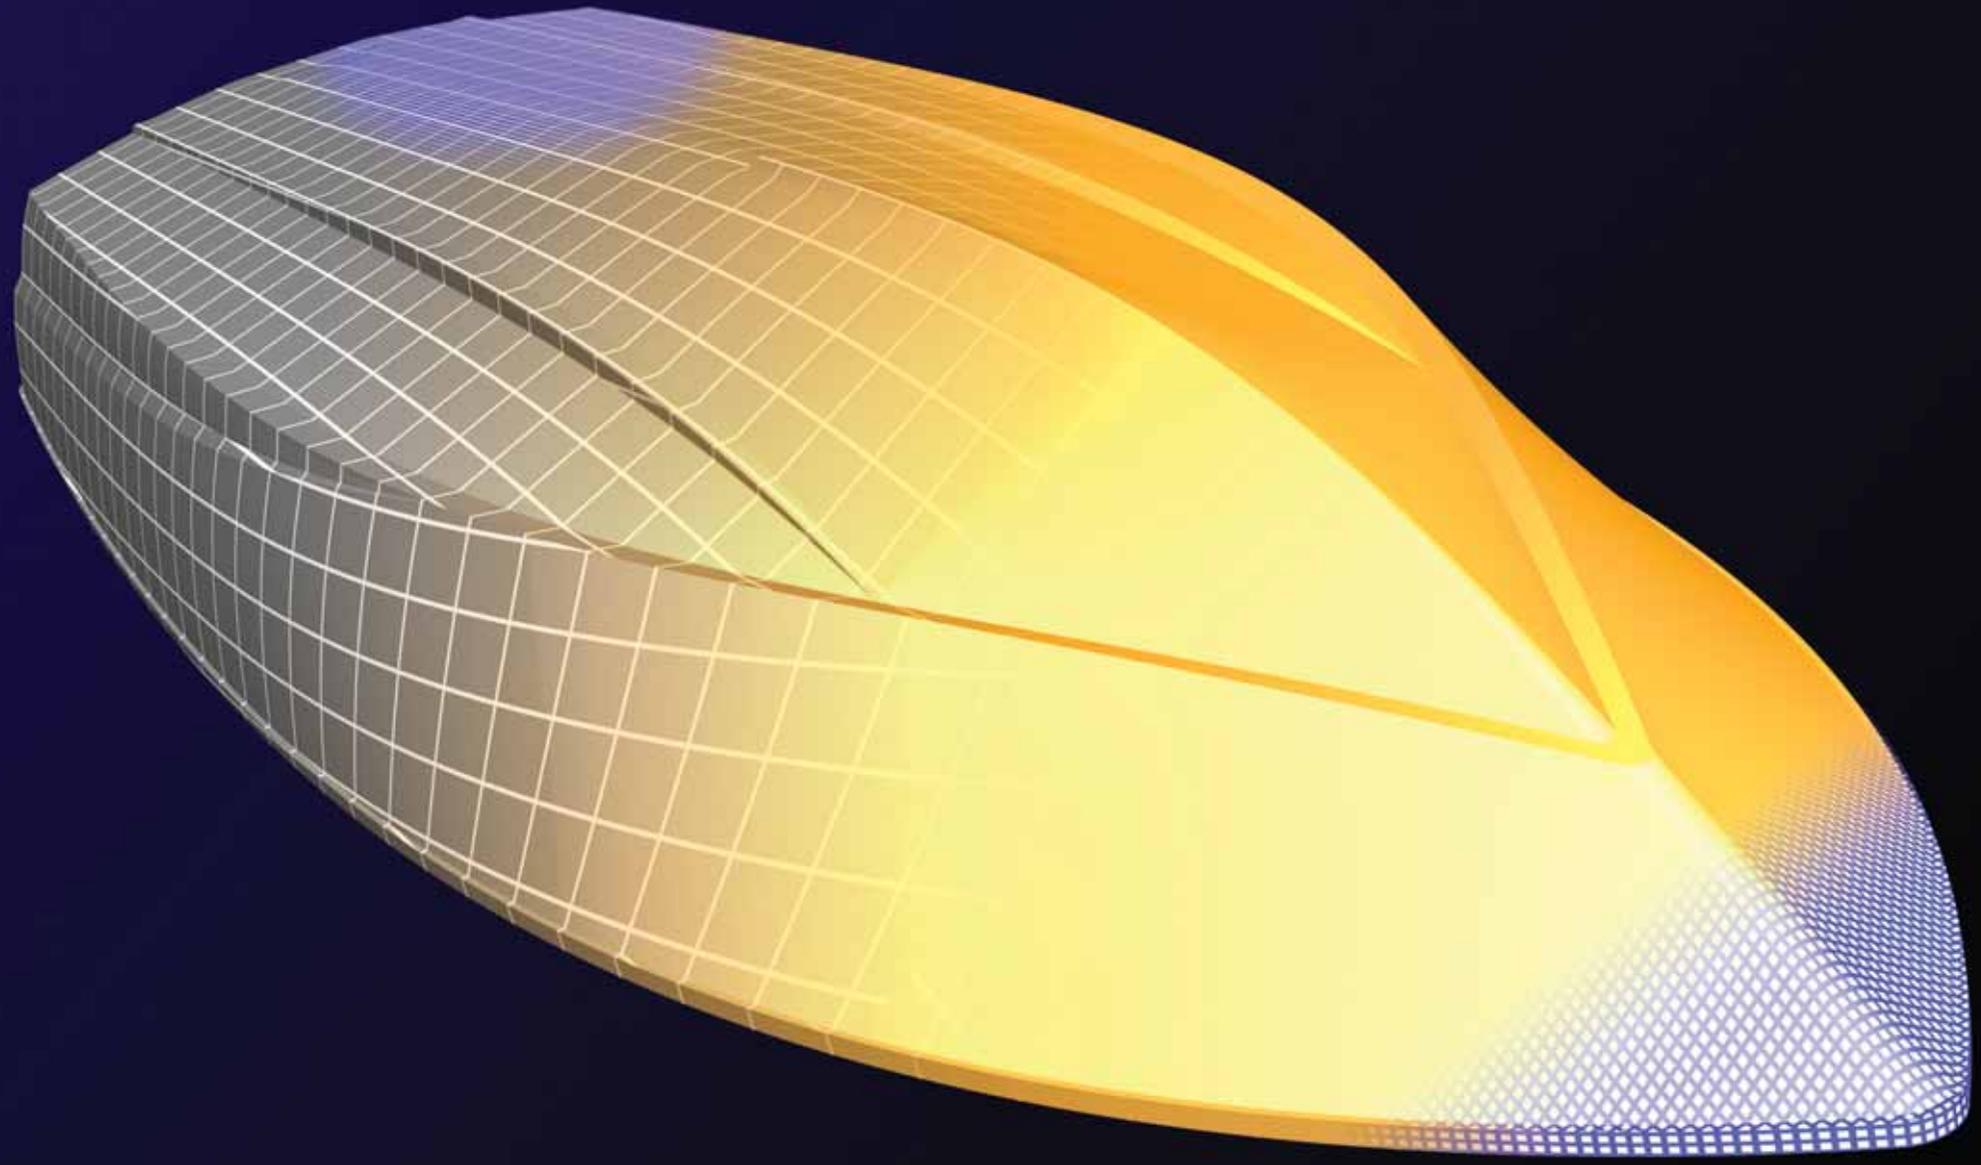

Precision Pro Speed Control. The new LCD graphical display in the center of the dash incorporates the industry's first standard world class cruise control for all water sports disciplines, from low speed surfing and boarding to crisp, steady slalom speeds.

Adjustable Rudder. Customize the torque of the rudder for the perfect pull or driving preference with the twist of an allen screw on Malibu's exclusive adjustable rudder. Malibu puts the controls in your hands.

Hull Design. The running surfaces of Malibu boats are digitally shaped into two unique footprints that command the flow of water differently. Malibu's Diamond hull is cut with sharp diamond-like strakes to funnel air under the boat, create more lift and displace less water, for softer wakes. The flat strakes of our Wake hull cause the boat to sit lower in the water, creating a bigger wake.

20

Introducing the Power Wedge—Convenience and Precision.

The Power Wedge turns huge wakes into huge designer wakes. Wake size increases but, more importantly, the shape can be customized to each rider's style and ability. A switch on the dash offers a range of five settings, for 400 lbs. to 1200 lbs. of displacement. A separate cockpit gauge pinpoints the exact Wedge location for rider preferences.

Wedge Technology vs. Other

Some competitors grind all the hook out of the hull design and use a trim tab that, when deployed, will push the bow down, negating any wake-enhancing hull displacement. A Trim plate only changes the attitude of the boat, but does not displace the hull. Therefore, only the wake shape changes. The Wedge utilizes advanced foil technology to displace the hull and at the same time adjust the attitude of the boat for huge, yet adjustable wakes. It is the only such system in the industry and has factored into five Boat of the Year Award performances.

Wedge technology

Trim plate

Towering above the marketplace with superior technology.

Malibu has always found a better way to design and manufacture boats. Our towers are no different. The distinctive design of our standard Illusion X and optional Blade give Malibu owners a look outside the box of stale jungle gym designs. The Titan Series III is Malibu's lone rear facing tower utilizing thick steel in place of aluminum. Every Malibu tower is first engineered for purpose and strength, but also designed to be beautifully incorporated into Malibu's elegant lines.

1.

1. Illusion X The Malibu Illusion X for 2006 is standard on all Wakesetter and Ride Series boats. New for this year is the quick pin breakdown tower, the first ever EZ spring assist for raising and lowering the tower with minimal resistance or load—an ingenious development for accessory loaded towers. Also new are the optional swing-away racks, for easier mounting and dismounting of boards, and a navigation light built into the highest tower point.

2. CFT Blade The stylish CFT Blade establishes its functionality through its light, but strong carbon fiber design and integrated list of accessories. Standard features of the Blade include a single or two-tone tower color combination, Kicker Ks693 speakers, integrated LS Sound Box and rack receivers available in a variety of custom finishes. Also standard is the new navigation light, built into the highest point of the tower. Optional vinyl tower covers are available also.

3. Titan Series III (shown on p.76) New Titan towers have a navigation light built into the tower. The optional swing-away racks will be made available to provide easier mounting and dismounting of boards. The new billet chrome tower mirror is also available for 2006 models. Additionally, the polished base plates on the series III spruce everything up with a fresher look.

Simply peerless—The world's finest 3-event ski boats.

No matter how you measure it—Boat of the Year awards, world records, personal bests, quality or styling—Malibu's Performance Class of Response models comes out on top. Compelling as this is, even more impressive is achieving this level without leaving the family behind. Every Malibu Boat of The Year and World Record performance, including Chris Parrish's new World Slalom Record, has been achieved in our family friendly open bow configurations. And building a boat that brings the whole family together is worth more than every award combined.

the Lewis family. In the four years since they've become Malibu owners, the Lewis family of Redmond, Washington has used their boat for both Dad's dawn patrol ski runs and daughter's late afternoon wakeskate sessions. Mother Dañela, an accomplished ballerina and runner, says of the four tournament brand boats they've owned "It's the easiest to drive!" while pre-teen athlete Colby enthuses "We love our Malibu!"

Value beyond performance.

When someone is looking for an outstanding boat with great slalom wakes they usually stop here—at the highly regarded Response LX. Malibu is the only manufacturer to offer a world class slalom boat that can be turned into a trainable wakeboard boat with the addition of a Wedge. Hard to believe? It's true...and this boat is truly versatile. Standard amenities include: locking rear storage, driver's lumbar support, standard Precision Pro Speed Control, center LCD graphical information display. *WaterSki Magazine* captured its essence when they said: "The wakes behind the Response LX are every skier's dream."

one. The Response LX is designed with abundant storage, thoughtfully illuminated by interior lighting for convenience and safety. The locking rear storage trunk opens to the swim platform for easy skier access. Its ample space readily accommodates the largest skis.

two. The Response LX features beautifully sculpted side panels, billet emblems and safety hand-rails plus a voluminous double-netted storage center for towels, clothing and other passenger totes. Indirect lighting in gunnel areas aids night-time downloading.

Designed to slice through the course and all preconceptions.

The first walk-thru open bow to pull the greatest skiing performance ever, this boat smashed a record as well as open bow stereotypes. That world record stood for eight years until Chris Parrish and his partner, the Response LXi, demolished it in 2005. Yet most of the buzz it generates surrounds how this boat performs for pros and families alike. Even sitting still, this boat inspires awe, with its one-piece tempered glass windshield, sleek styling, stainless rear vents and exquisite interior. New standard Precision Pro Speed Control and Electronic Throttle Control suggest the title greatest 3-event skiing boat ever built.

one. Standard Flip-up bolster, adjustable lumbar support and hand-wrapped dashes pamper the driver. Distinctive craftsmanship appears in stainless steel cupholders, one-piece windshield and Issotta steering wheel.

two. Malibu's patented swivel-head pylon incorporates needle bearings to eliminate ratcheting and eliminate rope wear, providing a safer pull for the family.

three. Well lit, easy-to-access storage is just one of the design features our engineers always incorporate. The locking, split-lid trunk storage becomes an inviting sundeck.

We've turned the family get-together into an art form.

From concentrated slalom runs to raucous wakeboarding, the family performance series is designed to please every style and level of expertise with exceptional overall performance to satisfy the expectations of every generation. Built on Malibu's honored SV Diamond hull, these boats are designed for efficient overall performance. We have packed these boats with power, perfected the layouts to accommodate a crowd in comfort, and filled them with amenities that will satisfy even the choosiest family member. With direct-drive comfort married to performance hulls, these boats amplify the benefits of owning a Malibu.

the Lockhart family. With six athletic teenagers to please, the Lockhart family of Washington is well suited to the Family Performance Series. Dad slaloms, while the kids mostly tube and wakeboard. Why Malibu? "The quality, style, wake and service at our Malibu dealer," says Rick Lockhart. "When we were ready to move up, we wanted to buy from them." Now the whole family skis behind a Malibu.

This is why you buy a Malibu.

The Sunsetter LXi is the family direct drive that keeps everyone happy, from the diehard slalom skier to the wakeboarding fanatic. The Sunsetter LXi is an exceptionally versatile performer that reaches the highest standards in every water sports discipline without sacrificing room, storage and comfort for the whole family. This year the Sunsetter LXi has been updated with new gelcoat and vinyl graphics, standard cruise control (Precision Pro Speed Control), LCD graphical display and our stunning new billet insert panel. It also features the new electronic throttle control for smoother operation.

one. Huge! That's the best description of the Sunsetter LXi's locking rear trunk. When the trunk is closed the rear padded area converts to a perfect sun lounge.

two. Malibu dashes incorporate quality Medallion instruments, billet insert panels and Italian designed steering wheels and throttle knobs for exquisite design and ergonomic comfort.

three. For crisp early morning runs, simply slide the standard windblock in place for main cabin comfort. When not in use, store it securely in the rear compartment.

Sometimes you have to take reason, logic, power and beauty and throw it in one boat.

The Sunsetter 21 XTi is the embodiment of family comfort, versatility and styling. This Malibu family performance series boat is a great choice for boating enthusiasts seeking Sport-V space and Direct-Drive control with multi-discipline water sports performance, especially those with a passion for world-class slalom wakes. The 2006 Sunsetter 21 XTi comes with our new Precision Pro Speed Control, the first standard world class cruise control system; ETC (Electronic Throttle Control), for the smoothest throttle performance on the water; and the LCD Center Graphical Display, which provides speed control and numerous other safety and monitoring data at a glance.

one. The deep, spacious bow features oval designed hand rails for safety, standard bow insert cushion for additional comfort, plus interior lighting for nighttime excursions.

two. The center storage compartment offers room for equipment and the removable table. Over-the-engine storage warms wetsuits and gloves.

three. The refreshment and entertainment console is conveniently located in the rear lounge and features a self-draining ice chest, available remote stereo control and speaker placement engineered for quality sound for rear passengers.

Direct drive versatility meets comfort zone mentality.

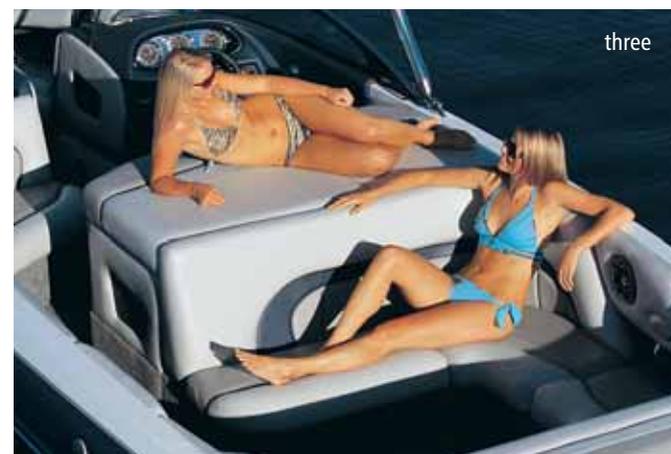

The Sunsetter 23 XTi is remarkable not only for its versatile interior layout, but also for its ability to serve up advanced slalom wakes or proffer mountainous board wakes at low speeds. This satisfying versatility comes from the direct drive set up on Malibu's SV 25 Diamond hull, plus the adaptable Wedge for wake control. The expansive rear wrap-around lounge not only offers a comfortable ride, but enables you to take advantage of the natural ballast of extra passengers. The Sunsetter 23 XTi is spacious enough to accommodate up to 14 adult passengers and all their gear.

one. A flip-up navigation light is standard equipment on the 23 XTi allowing for a safer, flush alignment and cleaner appearance when not in use.

two. The only direct drive with wrap-around seating, the Sunsetter 23 XTi enables passengers to lounge comfortably close to the action while actually contributing to increased wake size by utilizing the natural seating ballast in the rear.

three. The 23 XTi's unique interior configuration puts sunbathers in the center of the action with a padded sundeck, instead of isolating them aft.

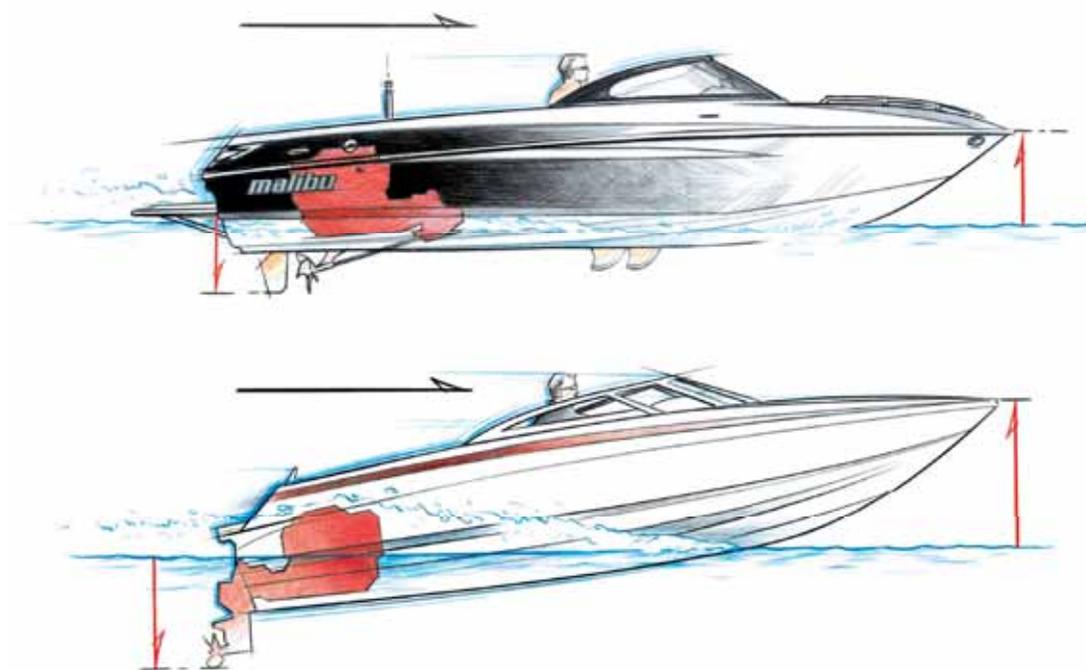

Malibu Sport-V class— The industry standard in performance, safety and value.

Malibu's direct drive luxury Sport-V has eclipsed the standard I/O in performance, comfort and safety. The Sport-V's appeal goes beyond superficial looks. Thanks to the inboard configuration and Malibu designed hulls, bow rise is reduced to nil, giving drivers increased peace of mind on busy waterways. Children can swim safely by the swim platform, as the propeller is located under the boat, instead of below the platform as it is on I/O's. The lack of a lower drive unit means no maintenance and no possibility of significant drive damage. All in all, a superior configuration.

the Pana family. The Pana family of Fort Worth, Texas, divide their Malibu time equally between entertaining and skiing. They chose Malibu because they found it to be number one in craftsmanship, roomy and comfortable enough to accommodate dad, Bernardo, mom, Shannon, and daughters Carly, 18, Cassie, 16 and six-year-old son Antonio.

It's a boat to release your inhibitions.

One of the most versatile V-Drive tow boats ever created, the Sunscape 21 LSV is agile enough to tow a pro through the slalom course and beefy enough to create a killer wake. It may be the only luxury sport-V you see on the slalom course. It's certainly the only one that deserves to be there. Completely re-tooled in '05 to accommodate Malibu's Diamond V25 hull, this boat is built for performance, with Gorilla fins, Instantaneous Response Technology (IRT) and all the standard features of a first class Malibu ski boat.

one. The Sunscape 21 LSV showcases a hand-stitched dash and billet drivers' insert panel. A billet glove box door is an optional accent to the finely crafted interior.

two. The Sunscape Series features a pop-up swivel-head pylon that can be lowered when not in use, for safety and convenience.

three. New this year, for the Sunscape 21 LSV, is a huge ice chest equipped with an insulated cooler that can be removed for convenient stocking or downloading.

Spoiled rotten never felt this good.

The roomy 23 LSV sets the standard for the Sport-V class with its unique features, passenger space, drivability and luxurious styling. Outfitted with Malibu's exclusive oversized Gorilla fins, the 23 LSV's tracking is exceptionally fine-tuned and handles like a much smaller inboard. The 23 LSV accommodates up to 14 adults, and includes a 96-quart ice chest, over 30 square feet of locking rear storage, plus the new Precision Pro Speed Control and Electronic Throttle Control, and billet dash insert with graphical display of cruise control, safety and monitoring information.

one. A conveniently located flip-down drink holder provides refreshment opportunity for backseat passengers and can be quickly hidden when not in use.

two. The Sunscape 23 LSV is equipped with two pairs of stainless steel pull-up cleats perfectly positioned for convenient tie downs or bumper placements.

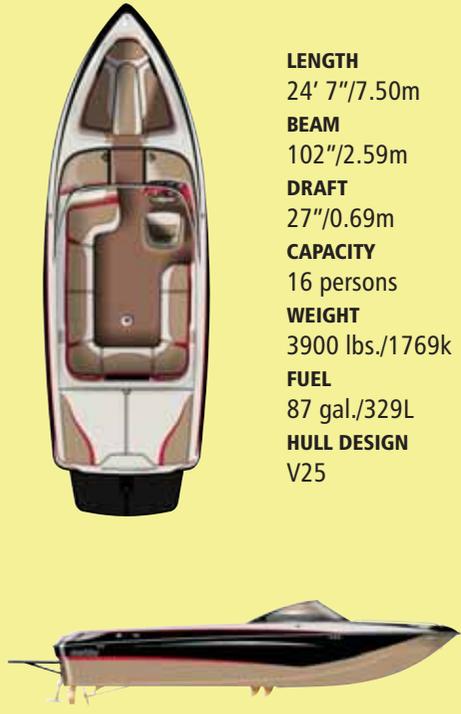

three. The Sunscape class comes standard with a removable table with four stainless steel cupholders, for times when you want to take a break from the action. The table stores handily under the rear storage hatch.

Luxury. Space. Style.

At 24' 7" one might expect the Sunscape 247 LSV to be limited in performance and handling compared to smaller boats in its class. But the 247 LSV, powered by the 400 hp Hammerhead 383 Stroker engine, is a performance marvel, carving out turns more aptly than boats a fraction of its size. The highly crafted interior offers 30 percent more cabin space than any boat in its class, with seating for up to 16 people, it has a remarkable 86-gallon fuel capacity and is equipped with standard Precision Pro Speed Control, a Sony Stereo CD with Kicker power amplifier and eight Kicker speakers.

one. Spacious storage on each side of the engine and above the engine provides room for all gear plus, with locks located on each hatch door.

two. The removable table is strong and secure and includes four stainless steel cupholders and is easily stored out of the way under the rear hatch.

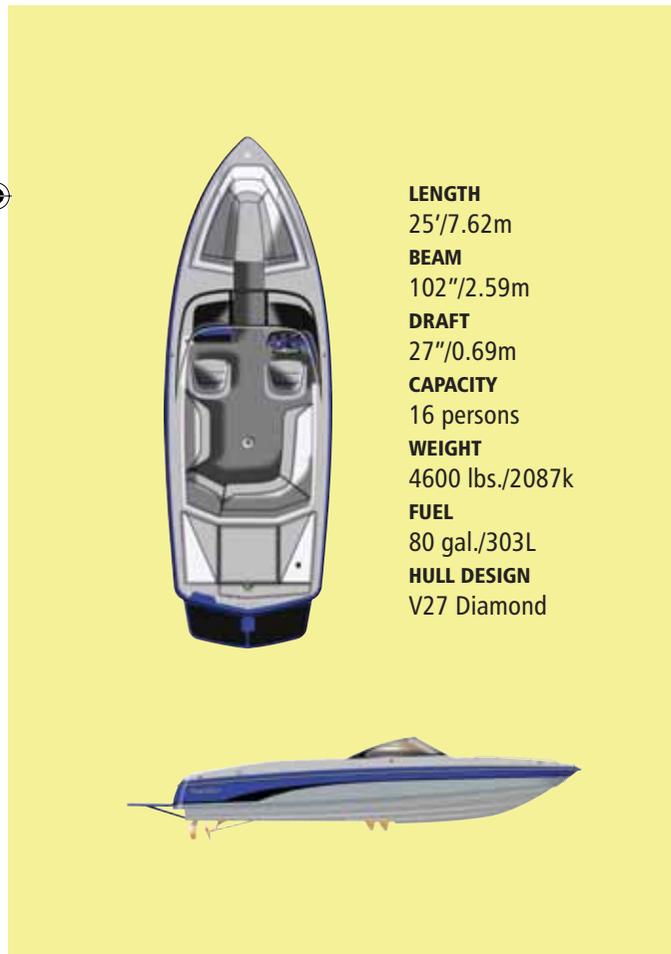

three. Malibu driver seats are engineered for extreme comfort and function with adjustable lumbar and a front flip-up bolster for shorter drivers. The entire seat swivels for easy entry and exit.

A luxury ride with a performance attitude.

The Sunscape 25 LSV is as big and powerful as a Malibu gets. It also has features that other Malibus do not: a swiveling, front-facing passenger seat, a walk-thru transom, and an enclosed head. Families looking for a spacious boat with water sports aptitude that can handle big water conditions need look no further. Plus, the 80-gallon fuel capacity lets you go all day. The 25 LSV includes Precision Pro Speed Control and Electronic Throttle Control, new billet dash insert with graphical display and exquisite new gel coat and vinyl graphics for a refined, yet progressive, look.

one. Enjoy the pinnacle of listening pleasure, as the Sunscape 25 LSV comes standard with a Sony Stereo CD receiver, Kicker 500 watt amplifier and six Kicker speakers.

two. The Sunscape 25 LSV offers incredible leg room and perfect dash visibility for the driver. Thanks to passenger and driver swivel seats, everyone can join the conversation.

three. The Sunscape 25 LSV features a head compartment with portable head unit, or available pump-out system, to prolong the length of time you can stay out on the water.

The price may be entry level, but the concept is luxury.

It's like owning the lowest priced model of a high end luxury car. Although our ride series is priced to appeal to entry level buyers, the design and amenities of the models in this category are way beyond what the price would suggest. Built on a proven performance hull, the ride series includes standardized Malibu innovations, not lesser quality substitutes. We want all families to enjoy the product of our engineering excellence. We expect once you own a Malibu—any Malibu—you will never own anything else.

the Thomas family. "We are a very sports-minded family and Malibu's spectrum of functionality was a great appeal for us. The kids specifically enjoy the skiing, wakeboarding, and tubing capabilities of the boat. . . they also all thought . . . Malibu was the 'coolest' looking of all the boats." The Thomas family of Pennsylvania, three pre-teens and two active adults, takes full advantage of their recent Malibu purchase.

Own a Malibu, own a legend.

Elements that might be considered extras on other boats are built-in amenities in the Malibu iRide. From the standard Malibu Illusion X tower, to the adjustable rudder and the oversized cup-holders, the list of feature rich touches that make the iRide special is both lengthy and impressive. Built on the same SV23 hull that has been pulling pro wakeboarders to record heights for years, the ride series packs a powerful punch with its standard 320 horses and multi-port fuel-injected power.

one. The iRide has an additional storage trunk near the transom, with a helpful light feature, for tucking away boards and skis.

two. With Malibu's standard dual gas fills, you can pull up to any tank and fill one central tank from either side for hassle-free refueling.

three. The iRide is available with removable launch seats that allow two more people to comfortably share in the action behind the boat. They also provide increased ballast from the extra passenger seating.

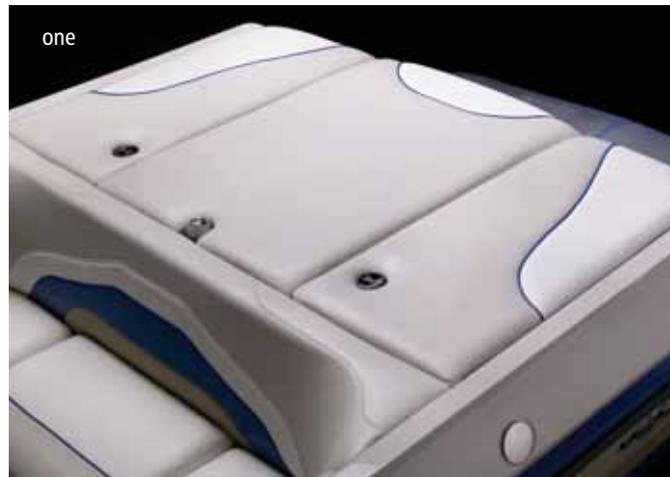

Designer wakes for the entire family.

This spirited 21 foot performance Malibu gives you all the power you need to pump up your performance to the next level. Malibu's new Precision Pro Speed Control enables you to keep your speed constant, whether you are pulling a rider or just cruising. Built on the same hull that has pulled countless Just Ride Series events and Malibu Open events, the vRide offers all you need to chase your own adventure on the water and unleash the performance of a lifetime.

one. The vRide's full-length sundeck is not only comfortable and spacious, it also disguises two enormous locking storage compartments in the rear.

two. The vRide is equipped with a large, self-draining ice chest, conveniently located behind the driver's seat.

three. Malibu's billet emblems are just another indicator of the quality materials and craftsmanship that separates Malibu from other water sport boat manufacturers. You will find these sparkling stainless billet emblems throughout our line-up.

An adaptable design for fluid fun.

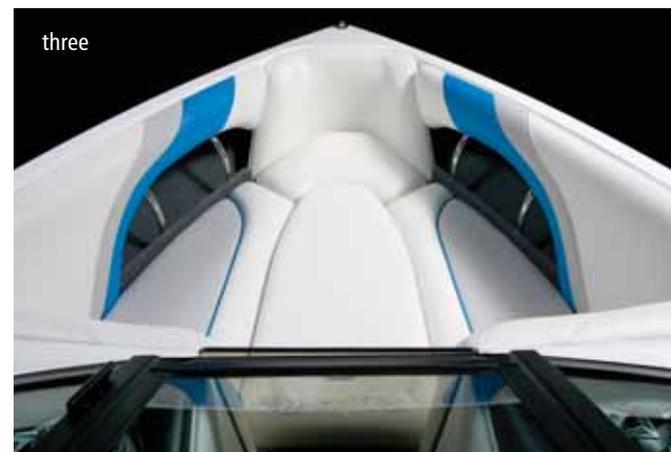

Versatility is a hallmark of the Malibu Ride XTi. Combined with a value-price, this v-drive/direct drive hybrid design offers extraordinary value for your wakeboarding requirements. Boarding is unquestionably a social sport and the XTi's wrap-around seating design and open bow area enable you to comfortably accommodate a crowd while still providing a performance pull. The standard Illusion X tower and Malibu Launch System (MLS) put you in the limelight and offer the opportunity to express yourself and turn in your most satisfying performance.

one. The only direct drive with wrap-around seating provides passengers front row viewing during wakeboard sessions. The Ride XTi has three separate social zones including the sundeck in the center.

two. A huge storage center behind the driver hides gear and, when closed, becomes the perfect place for catching some rays.

three. The Ride XTi has a very comfortable bow and with a standard bow insert cushion it becomes big enough for three adults and deep enough for peace of mind.

The most advanced wake creating machines on the water.

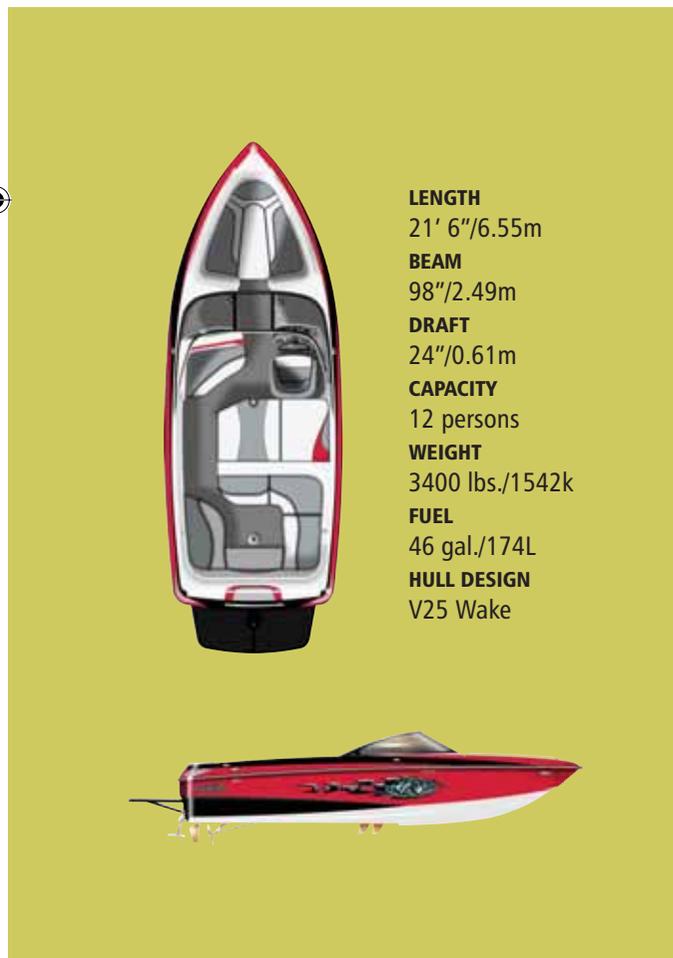

the Orzechowski family. Mike and Ellen Orzechowski are on their fifth Malibu boat, having first become Malibu owners in the early '90s. They are a diehard wakeboarding family, especially sons Derek, 22, and Bevin, 15. Says Dad: "Malibu is more desirable than all the other boats, they keep getting sharper and better all the time – they are way ahead of the others! Also, we appreciate the fact that Malibu is employee owned."

What makes Malibu's Wakesetter series so special? The name says it all: Wakesetter. This series offers specifically designed hulls that generate huge wakes, with the perfect characteristics and shape for aspiring riders. Malibu's new, exclusive Power Wedge option allows for true customization of wakes and wake shapes ranging from the equivalent of 400 lbs. to 1200 lbs. of ballast. It not only creates displacement for huge wakes, but can also be adjusted for shape—the only wake enhancement system that both builds wakes and shapes them. The Ballast Monitoring System data is now displayed, along with Precision Pro Speed Control, in the centered LCD graphical dash display, along with a bar graph which shows ballast volumes in each tank.

The first choice for a new generation of boat owners.

The Wakesetter 21 XTi is the current 2005 Boat of the Year from *Powerboat Magazine*. Not surprisingly, the Wakesetter Series is the number one selling wakeboard class in the world and the choice of the top riding professionals everywhere. This versatile cross trainer offers its V-Drive-like comfort on a scaled version of the 2004 Tow Boat of the Year hull, so it comes by its award-winning heritage naturally. The Wakesetter 21 XTi throws up wakes of seismic proportions and executes precise maneuvers with the same intensity.

one. The Wakesetter 21 XTi is about entertainment and the lounge refreshment console, complete with self-draining ice chest, perfectly positioned Kicker speakers and remote stereo control, keeps that entertainment in high gear.

two. Once you get past the beauty of the exquisitely detailed, hand-wrapped passenger dash, you will find a locking glove box providing functional, compartmentalized storage for passengers' personal articles. The glove box also contains a 12VDC outlet for cell phone recharging.

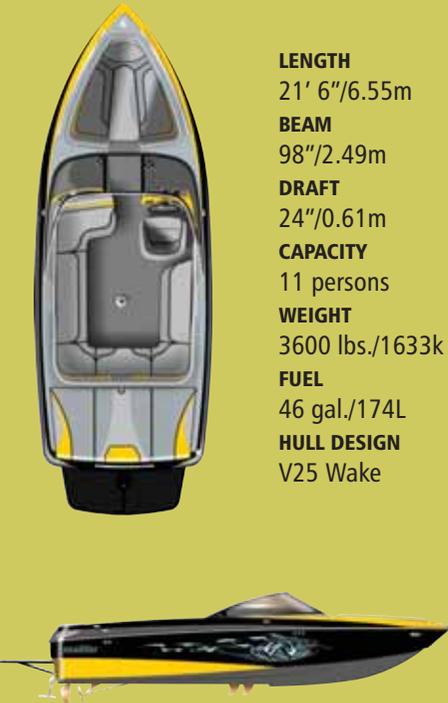

Launching world class performances daily.

The Wakesetter VLX is the official towboat of the most prestigious professional tournaments in the world, including the Wakeboard World Championships, Wakestock of Canada, Wakeboard Collegiate Nationals and the Malibu Wakeboard Championships. While each of the Wakesetters has a unique layout and size, their similarity lies in the fact they make no compromises in quality, performance and value. Our dedication to serving wake enthusiasts is evident in our updates, including the Power Wedge option for customized wakes, the Ballast Monitoring System and bar graph that shows ballast volumes in each tank for true rider customization, and more.

one. The newly designed dash incorporates an LCD graphical display that provides drivers Precision Pro Speed Control information and other safety and monitoring information. The 5" tachometer and speedometer also have LCD screens in them to provide full time monitoring of depth, air and lake temperature and a host of other useful information.

two. The Wakesetter VLX has world class storage with two vast locking storage centers on each side of the engine hatch. When closed it makes a perfect place to lounge.

Brian Grubb

two

It just doesn't get any better than this.

The Wakesetter 23 XTi is another former Boat of the Year from *Powerboat Magazine*, one of many in our line up. And it's not surprising, as the Wakesetter 23 XTi brings the best of wakeboard boats and family cruisers together in one do-it-all package. The direct drive configuration allows you to bring along 14 of your closest friends, who can choose from any of three distinct seating areas. With a hull digitally shaped and shaved to optimize wakeboard performance and maneuverability, the riders who launch off these wakes may be detectable by radar.

one. An oversized, flip-down drink holder is ever-ready to cuddle cool refreshments, but conveniently tucked away when not in use.

two. Imagine being able to keep your wetsuits and towels warm. Malibu did, and our imagination resulted in the storage above the engine compartment.

three. With a crowd, snacks may be in order. You will be prepared, with our fold-out table for four, including drink holders. When not in use, tuck it safely away in its space in the back.

In pursuit of the perfect wake? Look no further.

The Wakesetter 23 LSV is the personal boat of World Champion Darin Shapiro and the boat he uses for his personal Riding School. If it's good enough for a world champion, chances are your family will be equally pleased. Large, powerful, plush, the Wakesetter 23 LSV packs in more ballast and features than any other boat in its class. The Wakesetter 23 LSV offers riders and their gear a whopping 30 cubic feet of rear locking storage. The two 200 lbs. ballast tanks that used to invade this space are located beneath the floor and out of the way.

one. The Ballast Monitoring System data, which enables you to track and duplicate individual wake preferences, is now easily visible in the centered LCD graphical dash display, featuring a bar graph that shows ballast volumes in each tank.

two. Our quality knows no bounds even when it comes to our cup holders which are abundantly available and intuitively located throughout all areas of the interior, and are made of high quality stainless steel.

Some prefer the ordinary, for the rest of us there's the Wakesetter 247.

There is plenty of room for all in the new 247 LSV. While built on performance bloodlines, this boat also meets the criteria for the all-important hours when nothing matters more than being together. The Wakesetter 247 LSV offers more: more seating, more ballast and more pulse-quickenning styling plus features that create an entirely new standard in wakeboarding boats today. The Wakesetter 247 LSV rides upon the V25 hull. Combined with the new Power Wedge and standard 1150 lbs. of ballast, it churns up the biggest wakes in the business. Optional bow ballast tank of 300 additional pounds for the glutton.

one. The Wakesetter 247's little details make a big difference including the LED lighting and stamped chrome Malibu logo in the gunnels.

two. When you have a boat full of passengers working up a thirst, it's best to be prepared. The voluminous ice chest is conveniently located behind the driver's seat and comes with a removable liner for easy loading and downloading.

three. Passengers can take control with a rear entertainment console that features the available remote stereo control and Kicker speakers.

Buy a Malibu; file your flight plan.

The Wakesetter 25 LSV is the best combination of big lake, luxurious cruising and world class riding wake characteristics—perfect for those seeking more space and comfort but unwilling to sacrifice performance. The new Wakesetter 25 LSV is also one of the most exciting wakeboard boats available. When you take full advantage of this boat's ballast system, Illusion X tower and big-wake making potential you have a boat that pleases all generations, from relaxed cruisers to exuberant boarders. This boat also features standard Precision Pro Speed Control, is Wedge capable and has the power of the 8100 Vortec, boasting 450 horsepower.

one. The Wakesetter 25 LSV's amply sized rear storage can be accessed two different ways—through a locking hatch in the rear sun deck or with a flip of a switch at the dash.

two. Each Wakesetter 25 LSV comes standard with halogen docking lights for nighttime excursions and safer maneuvering around the dock.

three. The windblock doors can be shut in the bow walkway to cut down the cold wind, keeping passengers comfortable in the most extreme conditions.

We have laurels, we just don't rest on them.

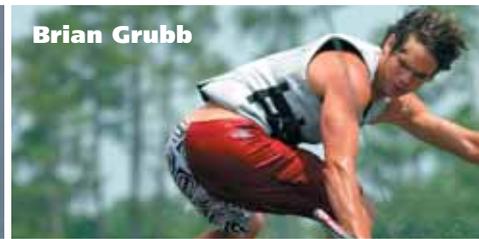

Malibu is about more than winning awards. We are about building the highest quality, highest performing water sports boats for you and your family. There is no better proving ground for our commitment than the prestigious World Class tournaments around the world. Likewise, there are no better critics to review them than the world's best water sport athletes. Malibu's Pro Team put our boats through the toughest tests possible, providing feedback every step of the way, so that we can continue to build the world's highest performing boats. . . for you.

Welcome to the family.

When you purchase a boat of Malibu's caliber, your investment buys more than a precision water sports vessel. You become a part of our heritage. It's not just the transferable, limited lifetime warranty, the three-year bow-to-stern warranty on all parts and labor, and the results of our award-winning engineering, design and craftsmanship. It's an attentive attitude. Our plant is open for tours five days a week. You can even schedule a tour of the factory while your boat is going through production. Welcome to the Malibu family.

Find everything Malibu online. Keep up with the latest Malibu news, build your dream boat online, find a dealer near you and see what events are coming to your area.

the Vruggink family. The Vruggink family have proudly owned seven Malibus in as many years, making the most of every hour on the water in Michigan. Dad, Scott, favors the craftsmanship while mom Jacklynn loves the roominess. Mitch, 17, and Tiffani, 14, prefer wakeboarding and tubing for the most part. But, Scott says "it's also great for a Sunday afternoon ski." All in all, they consider Malibu an essential element of their family fun.

1. Sony XM Receiver This compact tuner adds XM satellite tuning capability to your Malibu Sony CD player for access to over 100 channels of music, entertainment, sports and news.

2. Issotta Throttle Knob Remember when a throttle lived up to its name? Put the hammer down with a new chrome throttle knob from Issotta. Standard on some Malibu boats and available on all others.

3. Pull-Up Cleats Malibu custom screened pull-up cleats are available for any Malibu boat to provide convenient tie-down locations.

4. Sony Remote With Malibu's additional Sony remote you can control your Sony Stereo system from the swim step of your Malibu boat.

5. Launch Seats Add additional seating to your inboard boat with Malibu Launch Seats placed on either side of the motorbox.

6. Kicker Amp. The Kicker 3-channel amplifier offered by Malibu has two-channel sections to push your front or rear-deck speakers, while the efficient Class D sub section produces 200 watts RMS (400 Watts RMS at 2 ohms) of bass.

7. Stainless Cup Inserts Malibu's stainless steel cup holders can add more glimmering points of interest to any Malibu boat interior. And this beauty is functional. Standard on most Malibu boats, optional on others, these cup holders are built to withstand the rigors of marine use and they are easy to keep clean.

8. Kicker Subwoofer Malibu's Kicker Subwoofer pumps out impressive bass with a Solo-Baric L7 8" subwoofer in unique one-piece, aluminum vapor-deposit cone that is more rigid than ever.

9. Driver's Seat Heater Keeps the driver warm and comfortable with an exclusive driver's seat heater. Available on all models.

10. Sony Xplode 10-Disc Changer Malibu's Sony Xplode CD changer holds 10 discs, and features 12-second Advanced Electronic Shock Protection to make even rough water enjoyable. This versatile changer plays CDs, CD-RWs, as well as recordable discs loaded with MP3 files.

11. Carpet Saver Maintain the beauty of your boat's carpeting by installing a Malibu Carpet Saver custom fit for each Malibu Boat. Colors available in Suede or Sterling. Available on all models.

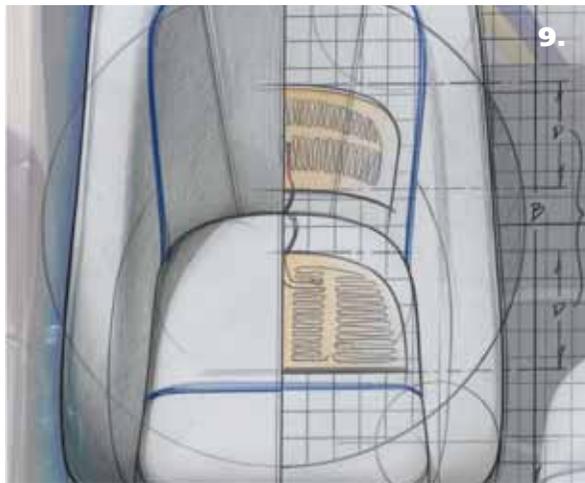

12. Issotta Steering Wheel Add quality and distinction to the driver's helm with the addition of an Italian Issotta "Vallelunga" Steering Wheel. Standard on some Malibu models and available on all others.

13. Kicker Speakers The Kicker DS525 6-1/2" speaker from Malibu offers comprehensive 3-way response in an aggressive marine made package. A polypropylene cone, UV-treated ribbed surround, upgraded voice coil, and a new basket design give the DS woofer the tools to over-achieve in your Malibu boat.

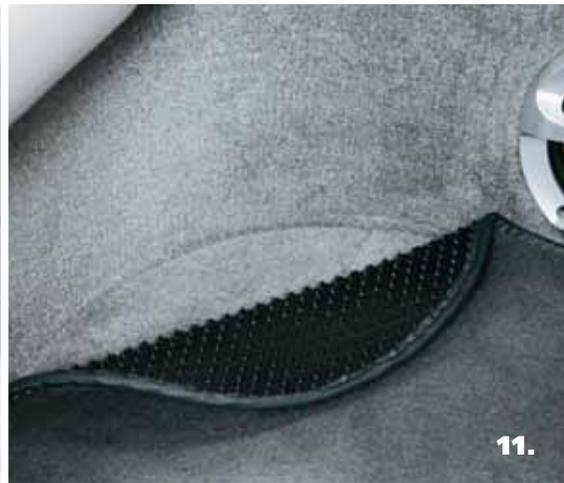

14. Sony CD Player Malibu's Sony CD player spins MP3 files recorded on CD-R or CD-RW format discs, as well as off-the-shelf music CDs. The Malibu Sony CDX-R5715X also features ID3 tag display, auto scrolling titles, detachable face with aluminum finish and an MP3 Auxiliary Jack so you can crank your MP3 player's digital tunes.

15. Billet Glove Box Door Our new billet glove box door is machined from a solid piece of aluminum, then chromed. Optional on all 21.6 and 247 models, it is a shining demonstration of the level of refinement to which Malibu has ascended with the 2006 model line up.

16. Pop-Up Bow Light Add a Pop-Up bow light to your Malibu boat for safer maneuvering.

16.

17. Illusion X Bimini Take refuge from the sun with a custom Sunbrella bimini top available on all models as well as custom tops to fit Titan, Illusion X and Blade Towers.

18. Titan Series III Bimini Take refuge from the sun with a custom Sunbrella bimini top available on all models as well as custom tops to fit Titan, Illusion X and Blade Towers. (Titan Series III Tower is standard on all Ride Series models in Australia.)

19. CFT Blade Tower Constructed of carbon graphite, the CFT Blade Tower has four 6-1/2" integrated Kicker speakers built into the tower design, standard. Optional Malibu Blade accessories include tower lights, bimini, racks, and a two-tone tower color combination.

20. Z5 Sport Cargo Rack and Bimini Malibu's new Z5 Performance Sport Rack incorporates "roof style" board racks into an aluminum-framed bimini for an unmatched custom look that provides you with more room in the boat. The Z5 bimini, made of premium grade non-stretch material for long life, measures 80" x 92" for optimum sun protection.

21. Illusion X Tower The Illusion X's forward sweep design and sleek look complement Malibu's body lines and eliminates the common box design. Standard on all Wakesetter and Ride Series models, the Malibu Illusion X is equipped with a built-in navigation light and may be fitted with swing-away racks, tower speakers, lights, and/or a bimini.

22. Fiberglass Swim Platform Malibu fiberglass swim platforms have been designed with a slight rocker to accommodate wakeboard and ski fins and to eliminate maintenance associated with wood platforms. Available on all models.

23. Titan Series III Tower Titan's latest design accentuates Malibu's boat lines with the use of bends and angles in unparalleled 2-1/4" steel tubing. Convenient breakdown, unparalleled stability and strength in design remain its trademark. The Titan Series III is available with a built-in navigation light and optional racks, lights, speakers and a bimini.

24. Swim Platform Cover Protect your swim platform from the elements and allow easier access to transom lifting rings with a Sunbrella Canvas Cover. Available in assorted colors.

23.

18.

20.

22.

24.

25. Docking Lights Add halogen docking lights to your Malibu for safer maneuvering around docks and when trailering. Docking lights are not available on Response Series boats.

26. Boat Cover Protect your boat with Sunbrella fabric boat covers for any style Malibu including custom fit tower covers. Each cover is custom screened with the Malibu logo. Available in assorted colors.

27. Bow Cover Custom tonneau covers are available for all open bow Malibu boats. Snap-on Sunbrella canvas covers protect bow upholstery and add additional protection from the wind.

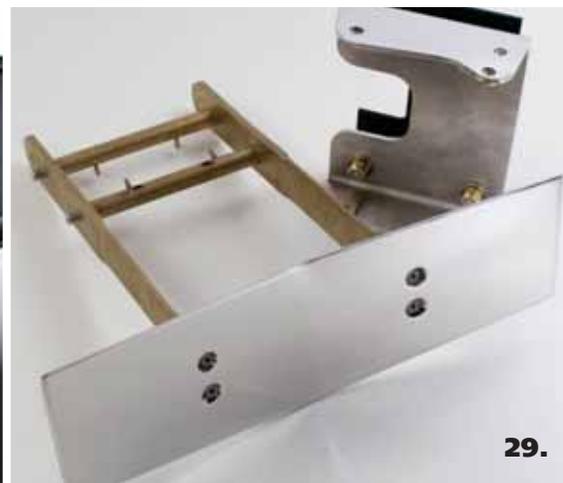

28. Custom Billet Trailer Rims Stand out from the pack and enhance your rig's package with custom billet rims available on Extreme trailers.

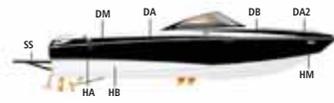

29. Stainless Wedge Malibu's ingenious wake producer gets a shine with the optional stainless Wedge and Transom Plate. Same great wakes with a little more appeal for those looking for the total appearances package.

30. Canvas Spare Tire Cover Malibu's canvas spare tire cover is embroidered with the Malibu logo and is custom fit for both 14" and 15" wheel sizes.

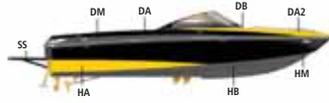

31. Scarpa Suppression Plate Precisely engineered to fasten to the four connection points of an existing Malibu Wedge plate, the Scarpa Suppression Plate (SSP) extends from the transom and reshapes the industry's most sought-after wake into a perfectly created barefoot wake.

32. Turn-Down Stainless Exhaust Tips Add style and function to your Malibu boat with the new turn-down polished stainless exhaust tips designed to lower exterior noise levels in your Malibu. Available on all Malibu models.
