

MALIBU BOATS *TWO THOUSAND SEVEN*

THE NEXT STEP

Over the past 25 years at Malibu Boats we have followed our own path, steadily climbing to the top of the boating industry. World Records, awards—and breakthrough innovations—became our hallmark. Yet we never lost sight of our goals: have fun building the best boats possible for a fair price. To us, the 2007 model year is just the midway point to 50 years, one third of the way to 75 years and a quarter of the way to 100 years of boat building history. So while we may glance back to acknowledge our accomplished past with a nod and a smile, we remain focused on what lies ahead. After all, there's always another peak to summit.

WE'RE JUST GETTING STARTED

To commemorate 25 years of innovation, Malibu introduces two exceptional models for 2007: the Malibu Response LXi and Wakesetter VLX Silver Editions. Shrouded in stealthy black gelcoat, accented with metallic silver and polished stainless steel, both models come equipped with a 400 hp Hammerhead 383 stroker engine. The Response offers the stuff world record dreams are made of, while the Wakesetter boasts all the amenities on a wakeboarder's wish list. This stunning pair of limited editions represent an opportunity to own a piece of Malibu history.

01. Silver Edition Extreme Trailer. Your Silver Edition Malibu will be perfectly poised for travel on our special SE Extreme tandem axle trailers. Designed for function and beauty, they feature a pivot hitch, stainless fenders, 17" Malibu wheels, large Patent-Pending LED running and brake lights and even includes a spare tire rack and an extra 17" Malibu wheel.

02. Silver Edition Dash. The Silver Edition dash is like no other in the Malibu line. It is hand-wrapped with Silver Graphite 38-ounce G&T Marine vinyl and studded with a unique Silver Edition Isotta Steering Wheel. These silver accents tie in perfectly with the billet dash insert and the chromed billet switch panels.

03. Silver Edition Passenger-Side Dash and Glove Box. Also hand-wrapped with special silver vinyl, the passenger side dash is a wonder all its own in the Silver Edition Series of boats. The chromed billet glove box accentuates the unique design with a commemorative Malibu Silver logo.

04. Silver Edition Side Panel. The side panels of the Wakesetter VLX SE will catch your eye with laser-cut Malibu Silver emblems backlit with white LEDs. The Response LXI SE shines with silver upholstered accent pieces as well as custom-made Malibu emblems. Both model side panels feature Rockford Fosgate 6.5" speakers, standard.

MEET MALIBU

Journalists have tried to explain it, other manufacturers have tried to mimic it, but the magic of Malibu Boats remains elusive. We believe our source of success is fundamental: people. Malibu is what it is today because of people. The exceptional people behind Malibu include the factory team, dealers, industry partners, pro athletes and most importantly, Malibu boat owners. The Malibu Difference is a phenomenon created by all these people and their relationships. Meet the people behind the name.

We would be nowhere without the support of families like the Nobledds. Malibu boat owners are not just customers, they are family and their input spurs innovation. They show us what we have done well and how Malibu boats impact their individual lives. They make our product human. They seek out the Malibu Family and make it their own.

TIM & KIMBERLY NOBLETT
Malibu Boat Owners

Team Malibu pro athletes, such as Dallas Friday, expend enormous amounts of energy testing the limits of our products. We are grateful for their insights. They make the boats better with their input and serve as Malibu ambassadors around the world.

DALLAS FRIDAY
Professional Wakeboarder

It all begins and ends with the factory staff at Malibu Boats. Doug Childres has called Malibu his professional home since 1989 and yet each day he strives to do his job, as Tennessee plant Manager, just a little bit better. Our employees look complacency in the eye and develop a new concept. They are always reaching for that next step beyond.

DOUG CHILDRES

Factory Team

A company's strongest link to the retail customer is the dealer. That fact plays a huge part in Malibu Boats' success. Our dealers are reliable, trustworthy, competent. Brett Tilly of Tilly's Marine is one of our first dealers and currently in his 24th year with Malibu. He and his crew make up one of our top performing dealerships in customer service and sales today. Good relationships build longevity and we are in it for the long haul.

BRETT TILLY

Dealer

Strong relationships don't end with the people buying and selling boats. Malibu partners with industry suppliers like Chuck Rowe and Indmar Marine Engines, to build and install the highest performing, most reliable engines out there. Strong vendor ties improve research and development to help us deliver exceptional product to you.

CHUCK ROWE

Vendor

CLARITY OF DIFFERENCE

Even an untrained eye can quickly spot the difference in a Malibu designed boat. The lines are cleaner, elements are intuitively placed just where you would expect them to be, the seams on the upholstery match up. Together, these seemingly innocuous details create an integrated design that incorporates all of Malibu's experience and understanding of what makes a tow boat great. Examined individually, it's clear Malibu rises far above the norm in every detail, every element, every boat.

01. 03.
02. 04.

01. Precision Pro Speed Control. Malibu Precision Pro Speed Control makes its home in every 2007 Malibu boat, standard. In cooperation with Medallion Instrumentation, Malibu developed an exacting, user-friendly speed control to be utilized in any number of sport boating situations. From low-speed boarding disciplines to crisp, steady slalom speeds, Precision Pro Speed Control will even compensate for mid-session Power Wedge deployment or a hard cutting athlete in tow. Malibu's Precision Pro Speed Control offers unmatched consistency, usability and value.

02. Frameless Vented Windshield. A frame that fades to invisible black and polished stainless steel circular-vented corners make this windshield unique. The visibility, chiseled profile and extreme performance distinguish it as another Malibu innovation.

03. LED Lighting. 2007 Malibu boats are aglow with LED lighting. From storage areas, to side panels, to entertainment consoles, to transom lights and underwater lighting on some models, Malibu lights up with a difference.

04. Malibu Silver Steering Wheel and Throttle Knob. Silver grips, a shiny new wheel design and commemorative Malibu Silver center caps define the new Italian-made Issotta Steering Wheel and Throttle Knob as one of our outstanding features for 2007. This year's boats are a visible component in Malibu's storied history.

05. Hand-wrapped Dash. Two pieces of premium G&T Marine Vinyl, precise French Stitching techniques and a number of dedicated man-hours come together to form a Malibu hand wrapped dash. This is more than a styling enhancement. The Hand-wrapped Dash is a testament to the detailed craftsmanship built into every Malibu.

06. Swivel-head Pylon. Malibu's patented swivel-head pylon rotates on a precision dual needle bearing core and is strength tested up to 2000-pounds of pull. The seamless rotation eliminates ratcheting and rope wear for a smoother, safer tow and longer rope life.

07. Fiberglass Swim Step with Rocker and Slip-less Malibu Silver Pad. The available fiberglass swim step is engineered with rocker to hug your board or ski for stable pre-session preparation and reduced fin stress. For 2007 this platform is covered with a cushy rubber mat stamped with a new Malibu Silver design.

08. Stainless Malibu Exterior Emblems. Malibu is branding their 2007 models with cast stainless steel Malibu emblems and designators. Five millimeters thick and polished to a mirror finish, these badges elevate the Malibu Difference to another level. These stainless emblems are standard on all 2007 Malibu models excluding the Response and Ride Series.

05. 07.

06. 08.

INNER BEAUTY REVEALED

The only way to truly comprehend the inspired design of Malibu interiors is to feel it. Each Malibu interior is the perfect blend of ergonomics and artistry. Witness the perfect seam alignment, quality hand-wrapped dashes and throttle consoles. Experience the seats, ideally angled for optimum comfort. Standard creature comforts abound, from huge locking rear storage compartments, insulated removable ice chests, stowable table and indirect LED lighting to available exclusive high end stereo components from Rockford Fosgate® and Sony®. Acquaint yourself with excellence. Step into a Malibu.

01. UPHOLSTERY AND SEATING DESIGN

Malibu seats and lean-backs are designed to revitalize as well as delight. Cushions are filled with three distinct densities of foam for optimum comfort and durability. Multiple textures and colors of 38-ounce G&T Marine Vinyl are used for beauty and longevity. A variety of intricate stitching techniques and backers are applied based on their location on the cushion and the nature of its use.

02. AUTOMOTIVE-STYLE DRIVER'S SEAT LUMBAR

Comfort plays an important role in the driver's experience. A driver cannot be receptive to the responsiveness of a Malibu boat without a comfortable seat. Malibu has followed the lead of the automotive industry and designed a driver's station with adjustable mechanical lumbar support. The wait for most desirable seat in the house just got longer.

03. CHROMED BILLET SWITCH PANELS

Your eyes will drink in the visual beauty and your fingers will revel in the precision. New chromed billet switch panels offer a polished, stainless steel backdrop for Malibu's masterful control center. Recessed multi-position rocker switches remain flush with their billet host no matter what their position.

01. 02.

03.

CONSTRUCTION

The Malibu name on a boat denotes intuitive engineering and quality that stands the test of time. Yet after 25 years of tow boat production we still scrutinize every process in search of a better way. We listen to our engineers, our people out on the line, dealers taking delivery of the boats and especially the families on the lake every weekend. Their feedback makes us better; they are the reason we have cutting edge processes and tools in place today.

01. 02.

03.

01. MOLD PREPARATION

Our flawless exterior finish is achieved through careful mold preparation. An entire day is spent meticulously cleaning the mold, then hand applying four coats of wax. Hand applied tape lines are introduced only after the mold is deemed perfect.

02. PYLON CUT-AWAY

Malibu's patented swivel-head pylon incorporates needle bearings in the head for a smooth pivoting motion, eliminating rope ratcheting for extended rope life and increased safety.

03. GEL COAT APPLICATION

Each Malibu begins with a meticulously sprayed 10-step ArmorCote gel coat process. It is then backed with an exclusive, pure vinyl ester barrier coat and 3 oz. skin coat prior to starting the complete hand laid fiberglass procedure. Additional steps provide increased protection, value and life for each Malibu boat.

STAINLESS STEEL COMPONENTS

Every Malibu boat shines with the use of high quality stainless steel components in every facet of production.

07.

04. FIBECS

Malibu's patented Fiberglass Engine Chassis System (FibECS) allows for the engine to be through-bolted and the load to be dispersed over a greater area, for a more durable foundation, less vibration and quieter operation.

05. FLOORING SYSTEM

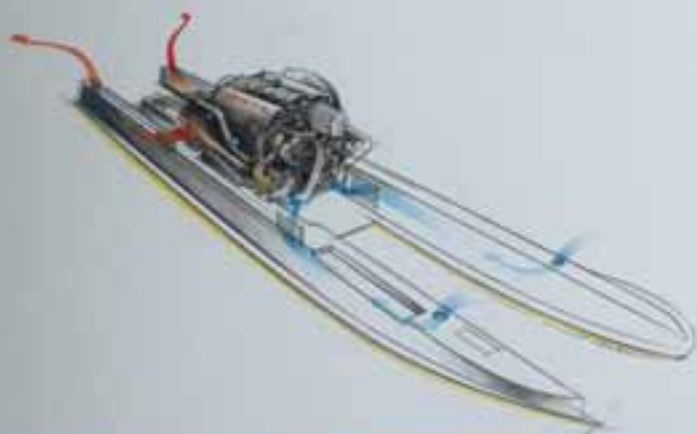

Malibu's composite Mantex flooring system, with a natural sound dampening quality, provides an indestructible foundation.

06. LISTEN CLOSELY

Malibu Sound Suppression Technology (MSST), incorporated in hull laminates, plus our unitized hull and deck construction make our boats stronger and quieter. Procedures in the construction process assist to separate noise and passengers from one another.

07. ELECTRONIC THROTTLE

Malibu employs Electronic Throttle Control (ETC) technology in every 2007 Malibu boat. Electronic Throttle Control eliminates cables and the associated binding, for extremely smooth throttle response.

04.

05. 06.

ABSOLUTE POWER

Malibu's close partnership with Indmar Marine Engines has resulted in four high performance power plants and made the difference in 13 World Records, 5 consecutive Boat of the Year awards and the No. 1 sales ranking in the tow boat industry, world wide. And since responsibility is an integral part of true power, Malibu and Indmar have introduced the new Extreme Tuned Exhaust with Catalyst on the 2007 Monsoon 340.

320 LCR

The 320 LCR (320 HP) is the multi-port fuel injected power-horse in Malibu's engine line-up. With 320 horses and 375 foot-pounds of torque, its core is the latest Delphi ECM (engine computer module) running the latest software, custom-calibrated by Indmar. The 320 LCR is programmed to deliver the power, turn-key starts, dependability and fuel efficiency that only Indmar's MPI delivers.

MONSOON 340 ETX/CAT

The Monsoon 340 (340 HP) delivers out of the hole with 397 foot-pounds of torque. This customized version of GM's Vortec 5.7L is designed specifically for Malibu's performance hulls. The new Indmar ETX/CAT one-piece tuned exhaust manifolds reduce Monsoon emissions to almost nothing. Add highlift roller cam and free-breathing Vortec heads and this engine equals one of the most powerful, dependable small blocks ever built.

HAMMERHEAD 383

The Hammerhead 383 (400 HP) is the most powerful 6.2L small-block V8 ever developed for inboard use. Its aggressive new appearance matches its 400 horsepower and 420 foot-pounds of torque. Capped with Malibu's exclusive intake plenum, it sports Indmar's high-flow multi-port induction system, GM's FastBurn aluminum heads and Indmar-spec cam with 1.6:1 roller rockers for less friction, more power.

VORTEC 8100

The 496 cubic-inch Vortec 8100 offers up to 450 horse power and 525 foot-pounds of torque. 9.1:1 high-compression Vortec heads turn out more usable power from every fuel charge. The MPFI aluminum intake manifold bolsters cylinder-to-cylinder airflow distribution for cleaner, more dependable combustion. Finely tuned plenum runners and the coil-near plug ignition system (distributorless) enhance low-end torque and deliver awesome power.

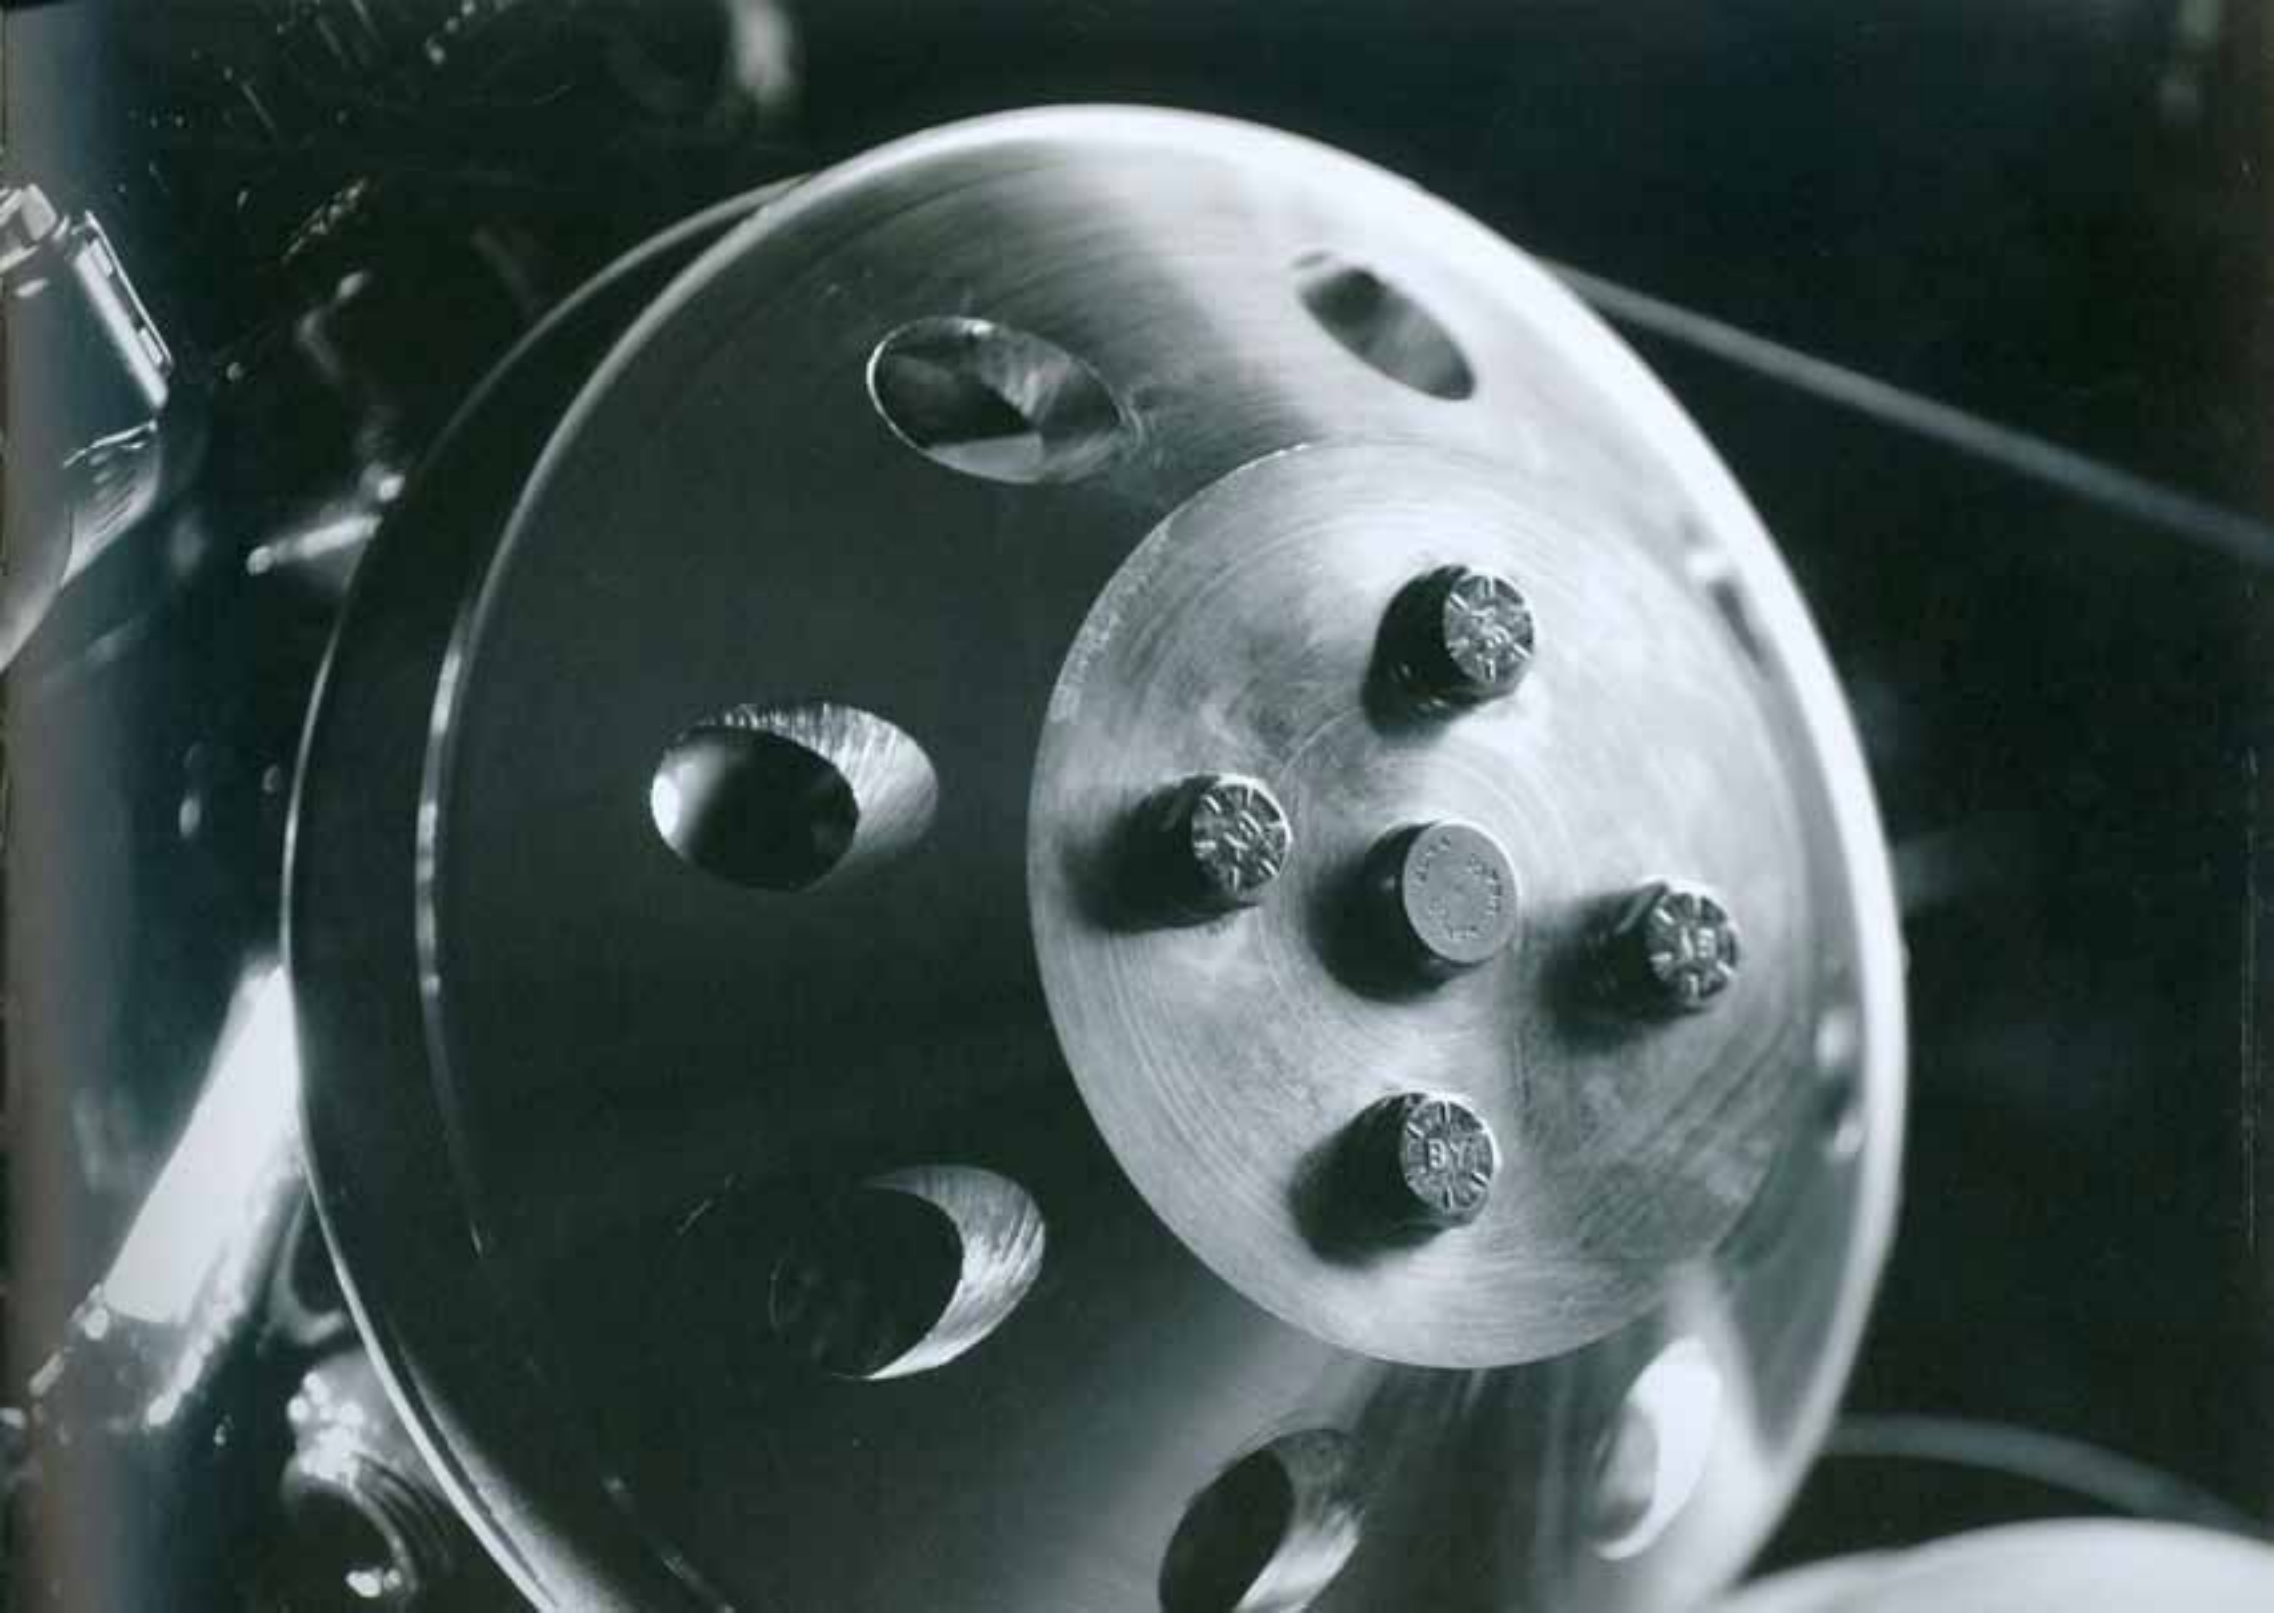

01. THE CATALYST

Malibu is offering the industry's first production-ready catalytic converter system ETX/CAT (Extreme Tuned Exhaust with Catalyst), patent pending, on the 5.7 Liter, Multi-port Fuel Injected, Monsoon 340. This innovative technology developed by Indmar Marine Engines significantly reduces exhaust emissions to less than 5 grams of combined hydrocarbons (HC) and oxides of nitrogen (NOx). After extensive testing Indmar found no measurable engine power loss thanks to ETX/CAT's extreme tuned manifold/catalyst design.

02. BREATHE EASY

The Catalyst is a huge achievement in boater safety. The new ETX/CAT exhaust system substantially reduces carbon monoxide (CO) gases in all part-throttle operating modes. A slow, no-wake cruise back to the marina is as relaxing as it should be thanks to the new Monsoon 340.

18

CNC Propeller. Every Malibu is equipped with precisely machined CNC propellers for smoother operation and higher performance standards.

Adjustable Rudder. Customize the torque of the rudder for the perfect pull or driving preference with the twist of an Allen screw on Malibu's exclusive adjustable rudder. Malibu puts the control in your hands.

Gorilla Fins. Gorilla fins, standard on nearly every Sport-V Malibu, offer greater tracking, stability and handling by virtue of their size and custom design.

Cut Diamond Hull. Malibu's new Cut Diamond hull is a 3-event enthusiast's dream. The geometry of this new hull's running surface has been optimized to precisely command the flow of water, displace less water and create a softer, flatter wake. This design improvement along with the straight chine perpetuates extreme agility and a phenomenal rough-water ride. Available on the Response LXi, Sunscape 20 LSV and Wakesetter VTX.

PERFORMANCE FOR SHOW

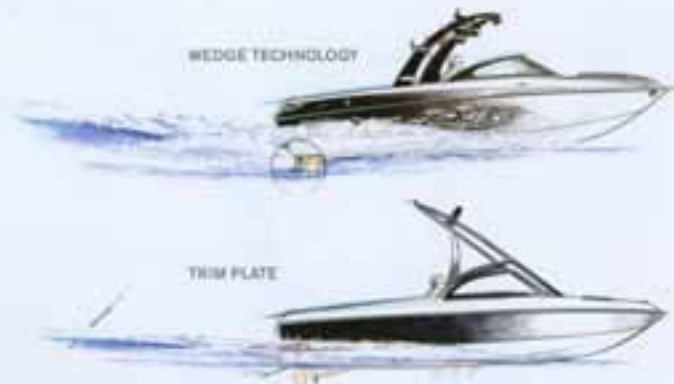

Malibu boats may look like show pieces, but these boats are meant to be used, not to sit on a trailer. Each Malibu boat is optimized for peak performance on the water. Wakeboarding, slalom, barefooting—it's true across disciplines. Hulls are individually engineered for disciplines on both ends of the wake spectrum. Water sports-specific features add versatility to each hull design. But, don't take our word for it. You be the judge. The conclusion is inescapable—this is the boat you have always dreamed of owning.

WEDGE TECHNOLOGY VS. OTHER

Some competitors grind all the hook out of the hull design and use a trim tab that, when deployed, will push the bow down, negating any wake-enhancing hull displacement. A trim plate only changes the attitude of the boat, but does not displace the hull. Therefore, only the wake shape changes. The Power Wedge utilizes advanced foil technology to displace the hull while also adjusting the attitude of the boat for huge, yet adjustable wakes. It is the only such system in the industry and was nominated for innovation of the year by WakeWorld.com.

01. WEDGE GAUGE

The driver will always be aware of the exact Power Wedge position thanks to the 2.5" Medallion gauge in the dash. This makes it easy to remember your personal settings for future runs. What more could you want?

02. STAINLESS STEEL CONSTRUCTION

The Power Wedge was rebuilt for '07 using stainless steel welded construction and a new stainless hood with a laser-cut Malibu Sun in either side. This new design increases corrosion resistance and strengthens the entire assembly for years of worry-free wake-making.

01, 02.

POWER WEDGE

Your wish is our command. Whether you want to soar like an eagle over wakes produced by 1200 pounds of displacement, or test out a new trick with only 400 pounds of displacement, the power wedge puts that control squarely in your hands. This electronically adjusted hydrofoil can be set to almost any position between stowed and fully engaged to change the size and shape of the wakes to your specifics. The Power Wedge means versatility on demand.

01. KNUTSON FAMILY

The Malibu Response LXi accommodates the growing family of Pro Slalom Skier Jill Knutson, including husband Andy, son Karsten and daughter Callaway, while its fantastic slalom wakes afford mom the opportunity to break a World record.

02. HIGH PERFORMANCE

Malibu promotes fingertip control even in high performance situations through Malibu Instantaneous Response Technology (IRT)—a combination of precisely-tuned underwater gear components, rack and pinion steering, TF Extreme steering cables and Electronic Throttle Control (ETC).

02.

01.

Twenty-five years ago Malibu started out with two basic truths at our core: performance and family. The Response LX and Response LXi retain this award-generating focus while continuing to roll out innovations for the family who enjoys serious recreation. The first boats to garner attention with Boat of the Year awards and setting World Records, these performance machines are enduring testaments to Malibu engineering with achievements like a head-to-head win over MasterCraft in the Pro Slalom Shootout and a Men's Slalom World Record.

PERFORMANCE SERIES

03.

03. DREW ROSS

Professional Slalom Skier and proprietor of the Drew Ross Ski Academy, loves that Malibu's Performance Series tow boats are advanced enough to pull him to the podium at World Class tournaments, yet versatile enough to build the skills of aspiring three-event competitors at his school.

Response LX

<http://www.malibuboats.com/models.aspx?modelID=112>

No matter what your aspirations—from first learning to ski to pro level slalom competition—the Response LX is designed to accommodate **YOU**. The Response LX, built on the 3-event SV23 Diamond hull, has pulled 11 World Records and earned three "Boat of the Year" awards from *PowerBoat Magazine*. Despite this fiercely competitive record, its price reflects a less intimidating side. Don't be fooled—the Response LX is Malibu throughout, with a steadfast performance that accommodates beginner to world record champion with equal satisfaction just by doing what it does best.

01. STAINLESS STEEL GRAB HANDLES

When extreme maneuverability is the outcome, safety is built into the design. Malibu has installed ergonomically shaped stainless steel grab handles so passengers can hold on tight when necessary.

02.

02. DRIVER'S COMMAND CENTER

Finding volunteers to drive is never an issue in a Malibu. There are few thrills as satisfying as commanding the power harnessed by a boat as agile as the Response LX. From the moment you sit in the cockpit, with its highly visible 5" LCD imbedded Medallion gauges, precisely-tooled chromed billet switch panels and a high-contrast center-mounted graphical LCD, you will feel the rush of power at your fingertips.

Response LXI

<http://www.malibuboats.com/models.aspx?modelID=113>

A good thing gets better. It was near flawless, yet the tow boat that pulled Chris Parrish to a Men's Slalom World Record went back to the drawing board for '07 and came out perfected. Malibu's ever-restless engineers applied their abundant imaginations to the possibilities and voila! The LXI now resides on the new Cut Diamond Hull, the most precisely designed hull ever created for three-event skiing. Capped with a new deck and Frameless Vented Windshield, then painted with progressive gel coat graphics, the new performance profile is complemented by its revisionist interior. The best just got better.

01.

01. TRUNK

The Response LXI accommodates a World Champion's family and gear as well as his or her record-breaking aspirations. The 11 cubic feet rear locking storage is capped with a split-lid for effortless rear seat or swim step access.

02. GUNWALE STORAGE

Not just an afterthought in the Response LXI, the gunwale storage space blends seamlessly with the overall sports performance design. Color-matched, hand-wrapped vinyl accents matched to oval-shaped storage rails and grab handles are where function meets beauty.

02.

01. REMOVABLE REFRESHMENT TABLE

Why waste a perfectly beautiful day sitting around indoors? If you don't feel like being exceptionally active, but you want the interaction of family time, why not set up the removable table in your Malibu Luxury Sport-V and enjoy a friendly game of cards until you're moved to get moving.

02. POP-UP PYLON

Each model in Malibu's Luxury Sport-V series includes a standard pop-up version of our patented, swivel-head pylon. This Malibu exclusive offers seamless rotation on precision bearings that eliminates rope ratcheting and wear for a smoother, safer tow and longer rope life.

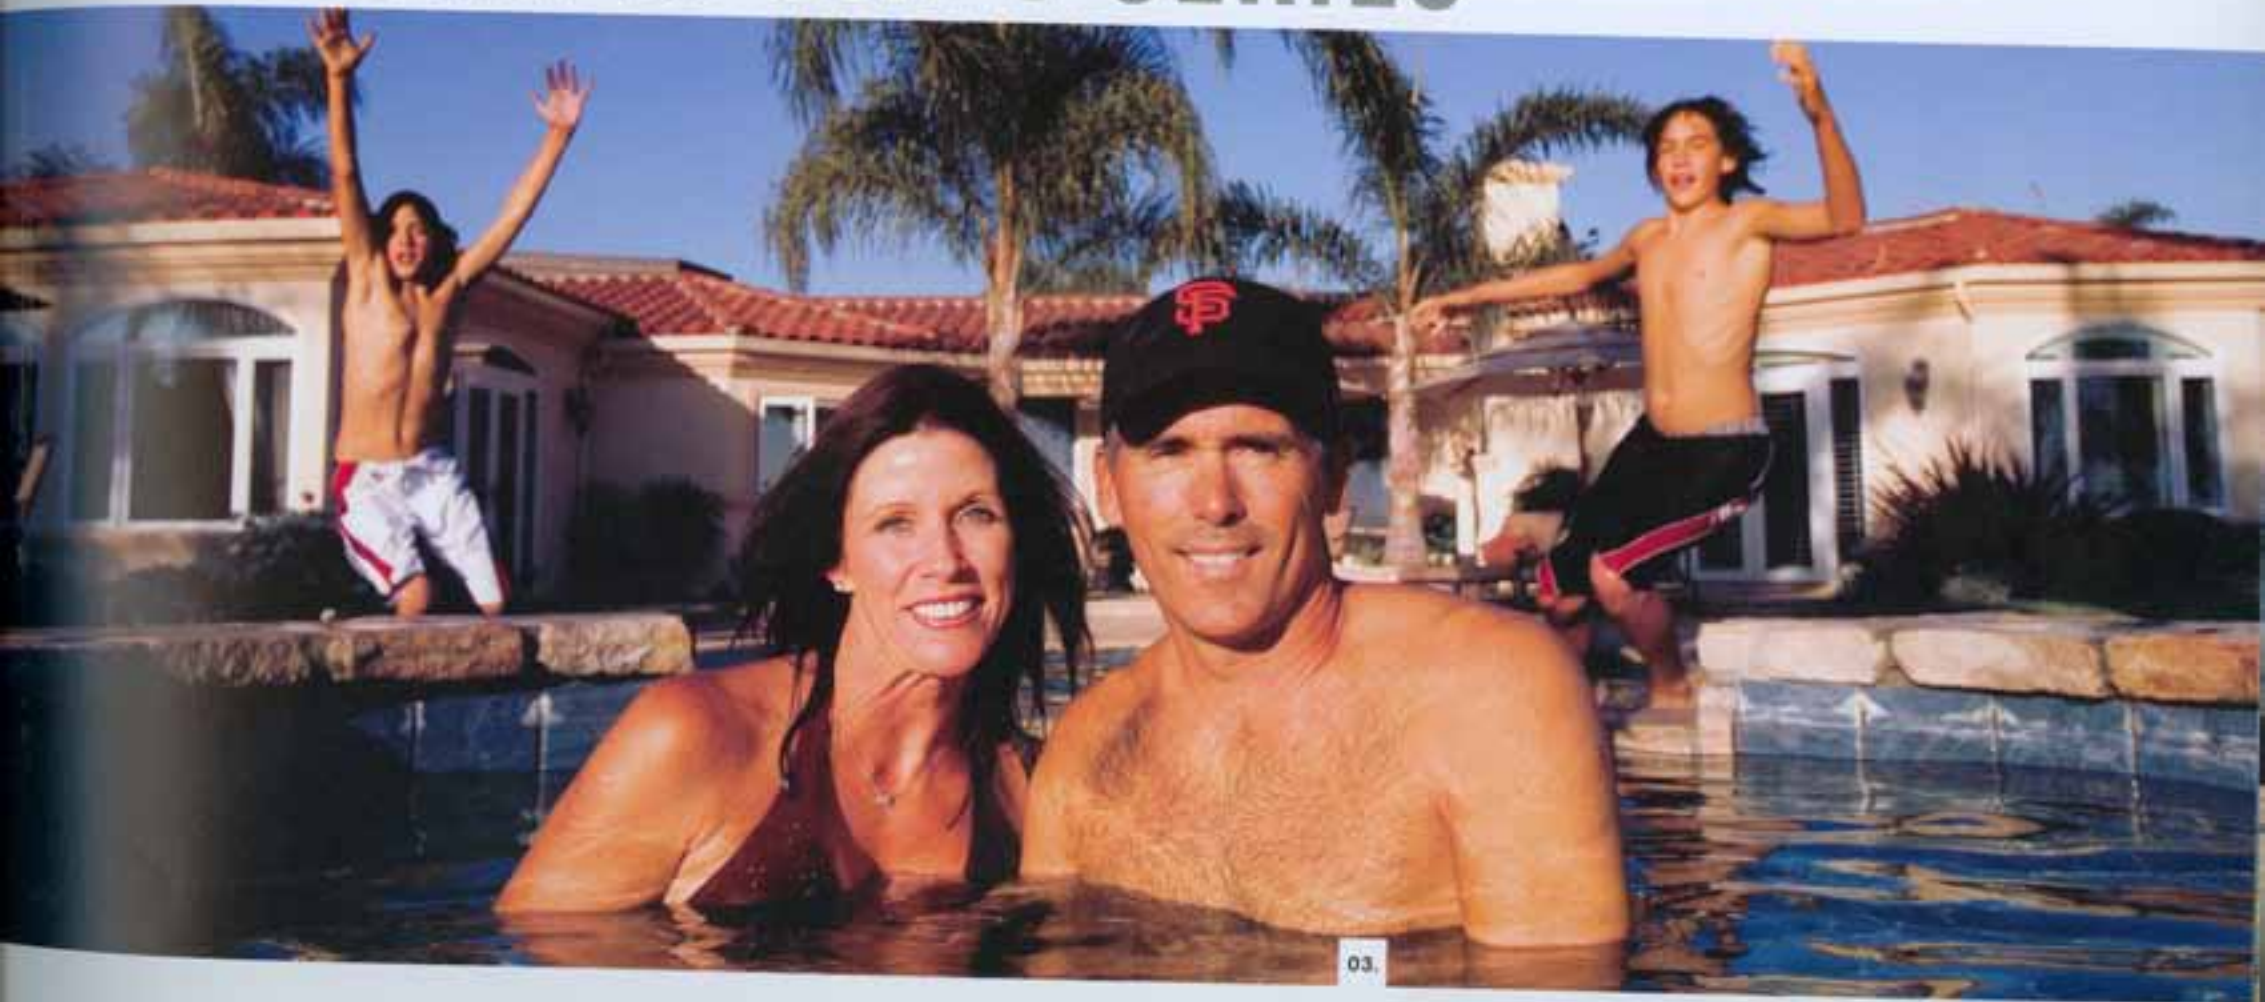

02.

01.

Malibu's Luxury Sport-V Runabout series represents the best family boating has to offer. With the inclusion of the Sunscape 20 LSV, the series now has options ranging in length from 20 to 25 feet. Born of water sports genealogy, these models are on par with the demands of pro athletes, yet perfect for families. Ease of use, low maintenance costs and superb handling characteristics distinguish our Sport-Vs from the typical, one-dimensional runabout. Features such as removable carpet inserts, Precision Pro Speed Control and our passenger side captain's chair option make the Luxury Sport-V series more appealing than ever for today's multi-talented boating family.

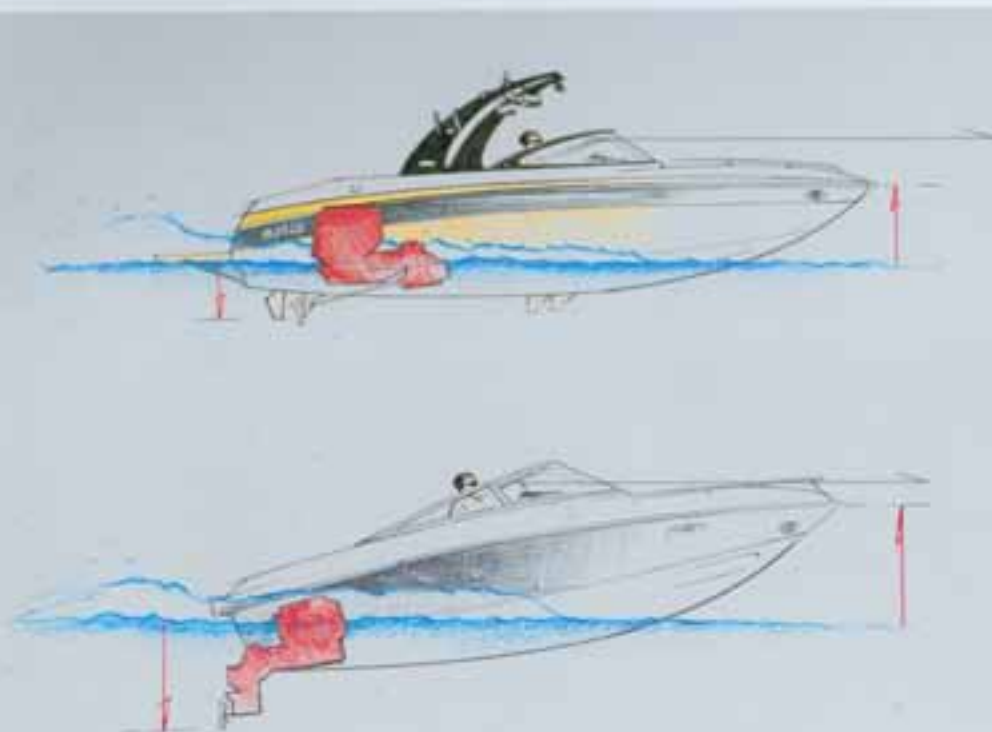

LUXURY SPORT-V SERIES

03.

03. THE FISCALINI FAMILY

Between baseball games, tennis matches and rounds of golf, the Fiscalini's find time to put more than 80 hours on their Malibu every summer. There is nothing Alec, 10, and Devon, 13, like more than their start-of-summer family trips to Lake Mead. When asked about the large amount of time they spend on the water as a family, Brian said, "We can't get enough."

V-DRIVE vs. I/O

Today's busy waterways demand you consider the advantages of V-drive design vs. standard I/O configuration. From safety to performance and comfort, the Sport-V has eclipsed the I/O in all respects. Safety is at the forefront of the V-drive's appeal because the prop is located so far underneath the boat that you can have complete peace of mind when children swim by the platform and passengers enter and exit the water. With its exquisite maneuverability, tight turning radius and complete lack of bow rise, it's easy to see where you're going and what—or who—might be in the way. Maintenance is a snap because the lack of a lower drive unit means no possibility of drive damage.

01. BOW RISE

Thanks to the inboard engine configuration and Malibu designed hulls, bow rise is reduced to nil, giving drivers increased peace of mind on busy waterways.

02. TURNING RADIUS

The intricate and intuitive design of a Malibu Luxury Sport-V allows for a tight turning radius even in high performance sport-boating situations. Hulls are deliberately shaped to encourage effortless turning and maneuvering. Factor in Malibu Gorilla Tracking Fins and rack and pinion steering, these boats will turn as sharp as a 25 foot diameter circle at speed. This kind of agility promotes safety when circling back to pick-up a down skier. They are not waiting, exposed on a busy lake, for the boat to make a slow, wide turn. Malibu's responsive handling also just makes these boats a blast to drive.

01.

02.

MAINTENANCE

The lack of a lower drive unit means no maintenance and no possibility of significant drive damage. All in all, a superior configuration.

SAFETY

Safety is just one area where a Malibu Luxury Sport-V swamps the I/O competition. Imagine not having to worry about passengers getting in and out of your boat from the swim steps. That is what it would feel like to own a Malibu rather than a typical I/O. The prop is located so far underneath the boat that it is not a safety threat as it is on an outdrive. How much is peace of mind worth? Children can swim safely by the swim platform, as the propeller is located under the boat, instead of below the platform as it is on I/O's.

Compact dynamo. At a mere 20 feet long, the garage-friendly Sunscape 20 LSV is the shortest model in Malibu's fleet, but there's nothing minimal about the enjoyment it provides. Its beamy 8.2 feet of width offers space enough for up to 11, with 130 square feet of interior—more space than some other companies' 21' models. Resting regally on the new Cut Diamond hull, this agile v-drive chews up the course and delivers direct-drive type performance. Interior details include polished stainless steel interior accents, multi-textural French-stitched upholstery, stainless steel cup holders and plush premium heat-set marine carpet behind a Frameless Vented Windshield.

01. HELM

The foundation of a high performance machine is engineering. Its complement is superior styling. That's what you will encounter at the helm of the Sunscape 20 LSV. Awaash in luxury, the two-tone, hand-wrapped driver's side dash, 5" LCD-embedded Medallion gauges and more are complemented by the Malibu Silver Italian-made, leather steering wheel and throttle knob.

02. REAR LOCKING STORAGE WITH ABOVE ENGINE BIN

The split-lid rear locking storage of the Sunscape 20 LSV is exceedingly accommodating. Combined with the Above Engine Storage, there's room for all the gear and extras 11 people could possibly need.

Sunscape 21 LSV

<http://www.malibuboats.com/models.aspx?modelID=114>

Just right. The Sunscape 21 LSV may just be the ideal boat. At 21.5 feet long and 98 inches wide, it offers wrap-around lounge seating for up to 12 people, extensive storage options, LED interior lighting and more. Enjoy the slalom-ready finesse of our responsive v-drive with its butter-smooth ride, or get amped for boarding with the optional Power Wedge. Recover stylishly in the plush, 38 oz tri-ply G&T Marine vinyl interior. Take a snooze on the comfy rear sun deck or raid the 60-quart ice chest. The Sunscape 21 LSV fits perfectly into a multi-priority boating lifestyle.

01. FLIP-DOWN DRINK HOLDER

We are customer focused and it shows in the details. Malibu Boats' Interior Engineers sweat the small stuff to improve the ownership experience, such as easy-access drink holders. In the Sunscape LSV interior there are 17 stainless steel cup holders, including two flip-down cupholders in the rear seat.

02. REAR SUNDECK

Take a cue from Team Malibu professional skier Jill Knutson and use the Sunscape 21 LSV rear sun deck to your advantage—as a place to focus and prepare for your next run, or a place to relax and relish the successful pass you just completed.

Sunscape 23 LSV

<http://www.malibuboats.com/models.aspx?modelID=115>

A finely-tuned experience. The Sunscape 23 LSV is back for 2007, filled to the deck with enhancements. The observer's personal storage area has been expanded and augmented with a non-slip rubber tray. The new entertainment console offers an extraordinary multimedia experience. Powered by Sony's new MEX-1GP stereo, two Rockford Fosgate console speakers, plus 4 others, spill flawless sound into every area of the 23 LSV. New interior LEDs, illuminated stainless Malibu-branded side panel emblems and the greener, cleaner Monsoon 340 power plant, add to the allure of the 2007 23 LSV.

01. OBSERVER'S DASH

The observer's dash in the Sunscape 23 LSV, with its 1.5 cubic foot capacity and hand-wrapped, two-tone 38 oz G&T Marine Vinyl, enhances its sophisticated appearance. The new locking glove box features a slip-less rubber tray for small valuables and 12-volt power point for cell phone charging.

02. SONY MEX-1GP STEREO

The Sunscape 23 LSV's new, custom stereo anticipates all your music needs. The detachable face Sony MEX-1GP accommodates CDs as well as digital tunes, with 1 gig of memory—enough for 500 songs or up to 32 hours of music. Includes a USB cable and is Satellite Radio ready.

Deliberate dimension. The distinctive design of the Sunscape 247 LSV immediately separates it from the herd as an extraordinarily versatile machine. The cab-forward design offers a lounge area 30 percent more spacious than any boat in its class. Size and space aside, the purposeful details inside and out are simply breathtaking. With room enough for 16 people and their gear, plus amenities only Malibu can conceive, it retains surprising agility with the cat-like reflexes one expects from a much smaller boat. Despite its 24 foot, 7 inch length, Malibu's hull design offers precise control and a smooth rough-water ride.

01. 120-QUART ICE CHEST

Talk about convenience—the Sunscape 247 LSV's voluminous ice chest is split into two compartments for food and beverage separation, has a removable insulated custom liner for easy loading and unloading, and easily drains into the bilge.

02. DOCKING LIGHTS

There's no reason to let the sun dictate the rhythm of your day when you're on the water in the Sunscape 247 LSV. The 55-watt halogen lamps of the stainless steel-framed docking lights combine with the bow and transom or tower running lights to ease your return.

Indulgent performer. If you're looking for a top-of-the line performer with a one-of-a-kind presence, you need look no further than Malibu's Sunscape 25 LSV. From the swiveling, front-facing passenger seat to the walk-thru transom and the enclosed head, this Malibu incorporates all the elements on your wish list. Coupled with the extraordinarily smooth ride of its deep-v hull, with no bow rise, and finger-tip controlled tight turns, there's no question this is an exceptional option for large capacity fun in refined comfort. With room for 16 people and their things, it's a stand-alone vacation package.

01. WALK-THROUGH TRANSOM

This isn't your boilerplate walk-through design with an out-of-place fiberglass cutout. Instead, Malibu has devised a flip-up upholstered lid to preserve the plush rear sun deck and the uniform luxury of the interior. Step through uninterrupted elegance in Malibu.

02. ROCKFORD FOSGATE SPEAKERS

Malibu '07 interiors are infused with the premium sound of Rockford Fosgate, whose glimmering speakers dump crisp highs, solid mids and booming lows into the Sunscape 25 LSV, standard. It's the marine industry debut for the performance audio system manufacturer, who chose to align themselves with the number one selling tow boat manufacturer, Malibu, in an exclusive partnership.

01. ILLUSION X TOWER

The distinctive, forward-swept design of Malibu's Illusion X tower was developed by our engineers to eliminate driver blind spots and complement the lines of Malibu boats. Made of cast aluminum, this accessory-welcoming tower offers pre-drilled holes and pre-routed wiring for easy installation, plus a Quick Pin breakdown feature for minimal resistance during raising or lowering. A molded-in pop-up navigation light serves as a post sunset beacon. (Standard on all domestic Ride Series models. Australian Ride Series models standard with Titan Series III tower.)

02. IMBRIACO FAMILY

The energetic Imbriaco family purchased a Malibu two years ago to because of the quality construction and water sports versatility. Marci and Stephan, who have both skied since childhood, are primarily slalom skiers but also like to sky-ski and wakeboard. Daughters, Nicole, 11, and Stephanie, 9, double ski, kneeboard and tube. Stephan sums up the family sentiment about their Malibu: "We love our boat!"

02.

01.

We benchmark our progress against our own achievements and 2007 is no exception. We think it's time water sports enthusiasts enjoy more, so the 2007 Ride Series sets a standard by which all other value class tow boats should be judged. Now, when you own an iRide, vRide or Ride XTi you will enjoy a standard Illusion X Tower, 500 pounds of ballast, Precision Pro Speed Control, new custom Ride Series vinyl graphics, a chromed billet dash insert, a new Dino Steering Wheel, chromed billet switch panels and a 320 horsepower multi-port fuel injected LCR engine.

RIDE SERIES

03.

03. BRENT STARR

The name of this series says it all, "Ride". These models are big wake makers from the start. All three built on the SV23 Wake hull which has been pulling pro riders, like Starr, to the podium at World Class tournaments for years. Not there yet? That's ok. The Ride Series offers customizable wake characteristics with the dash-commanded Malibu Launch System (MLS) and the optional Wedge or Power Wedge. You can build up to those first place finishes.

versatility by installing two mini-pumps to raise the hull and lower it for wakeboarding action. Upholstered to match the boat's custom interior, they also enable riders to customize their ride by distributing weight on either side of the motor box.

Affordable excitement. The iRide redefines entry-level with a host of standard features that are anything but basic. Malibu's quality standards are evident at a glance, from our premium materials to the smallest design details. The iRide offers all the power you need, with its direct-drive, multi-port fuel injected 320 horsepower engine. And it's easy to keep a steady speed with Malibu's Precision Pro Speed Control. Based on the same SV23 Wake hull that has been a pro favorite for years, the iRide delivers all the exhilaration of an intense wakeboard boat minus the sticker shock.

02. TRUNK

Malibu engineers believe storage space is a necessity, not a luxury reserved for higher priced boats. So the iRide trunk measures 13 cubic feet, to accommodate a board, vests, ropes, bags, towels and more. When in doubt, you won't have to leave it out of Malibu.

vRide

lounge design of the vRide welcomes 10 with 38-ounce G&T Marine vinyl and tri-ply interior foam. This common area invites the masses to take a load off and reach for refreshment in the 60-quart ice chest. With equipment out of site in the ample storage, and oversized cup holders throughout, your group will never feel crowded.

02. LOCKING REAR STORAGE

Some days you just have time for a quick ride and nothing more. In the vRide, 25 square feet of sun deck conceals 28 cubic feet of rear locking storage. This dual purpose section of the boat holds boards, bags, a boat cover, vests or whatever you choose to take along. Thanks to this secure storage area, you can walk away confident your gear is safe and inaccessible to others.

More for less. Malibu's vRide is the model of choice when you are ready to elevate your riding skills, but not willing to deplete your budget. Standard features, such as the Precision Pro Speed Control and a 500-pound Malibu Launch System for extra ballast guarantee you have the flexibility to expand your cache of tricks. Coupled with your choice of towers between the Malibu Illusion X and the Titan Series III, at no extra cost, and it is clear Malibu understands your needs. Later, add the optional rear MLS, the Wedge, or its new powered counterpart, to further expand wake enhancement.

01. JEFF WEATHERALL

Jeff Weatherall is stoked about the Wakesetter Series from Malibu Boats, he has a Wakesetter in Australia and one in Orlando. No matter where Weatherall is training and competing he only wants to ride behind the best. He joins other professional athletes like Dallas Friday, Darin Shapiro, Gerry Nunn, Chad Sharpe, Brian Grubb and Phillip Soven who all train behind Wakesetters. If you are looking to pump up your riding regimen, the Wakesetter Series has what you need.

02. REVOLUTION RACK

Just as the name suggests, the Revolution from Malibu is a fundamental change in board rack design. Utilizing cutting edge carbon fiber technology from Fundamental Industries, LLC, Malibu has designed an available board storage system unlike any other. The Revolution Rack has a patent pending bungee system at its core to secure your boards and a sleek anti-fork design constructed of carbon fiber. Styled exclusively for Malibu Boats' Illusion X tower, it is a must-have accessory. Subjected to 100,000 cycles of testing under load, the Revolution is the strongest, most rigorously tested board rack on the market. Beauty, function and strength. Experience the Malibu Revolution.

02.

01.

We ought to call it the 'Trendsetter' Series because the '07 Wakesetter Series introduces the most versatile array of styles and options one could imagine. We are innovating at both ends of the spectrum—from the addition of the garage-friendly, 20-foot Wakesetter VTX to the 16-person, direct-drive Wakesetter 247 RX. Our new, 'no fee' customization lets you choose between the trick-jacking Wake hull and the smooth riding Diamond hull on any Wakesetter model. Optional vinyl graphic packages let you stick with the standard directional Malibu Wakesetter design or bump it up a notch with the drip-mold "Core" Wakesetter hull design or the "Grunge" look that incorporates the model designation.

WAKESETTER SERIES

03. THE FRIED FAMILY

A self-proclaimed wakeboarding family, the Fried's choose Malibu for attention to detail, construction, and—of course—wake. Malibu owners since 1999, William, Tricia and daughter Paige are on Malibu number four. "You guys at Malibu just keep raising the bar on innovations and options," says William, "because of that, we want to upgrade every couple of years." While wakeboarding isn't their only extreme hobby, Tricia explains, "...having the boat keeps this family strong."

01

V25 WAKE

Consolidated performance. At a mere 20 feet in length, the Wakesetter VTX, packs enough professional level performance to rival the biggest v-drive on the market and still seats up to 10 adults. It is a wakeboarding machine, designed for a more intimate crowd, but without sacrificing wake quality or power. The interior is Malibu-plush and the sense of space defies comprehension. The new Frameless Vented Windshield enhances the effect, creating a uniquely aggressive profile.

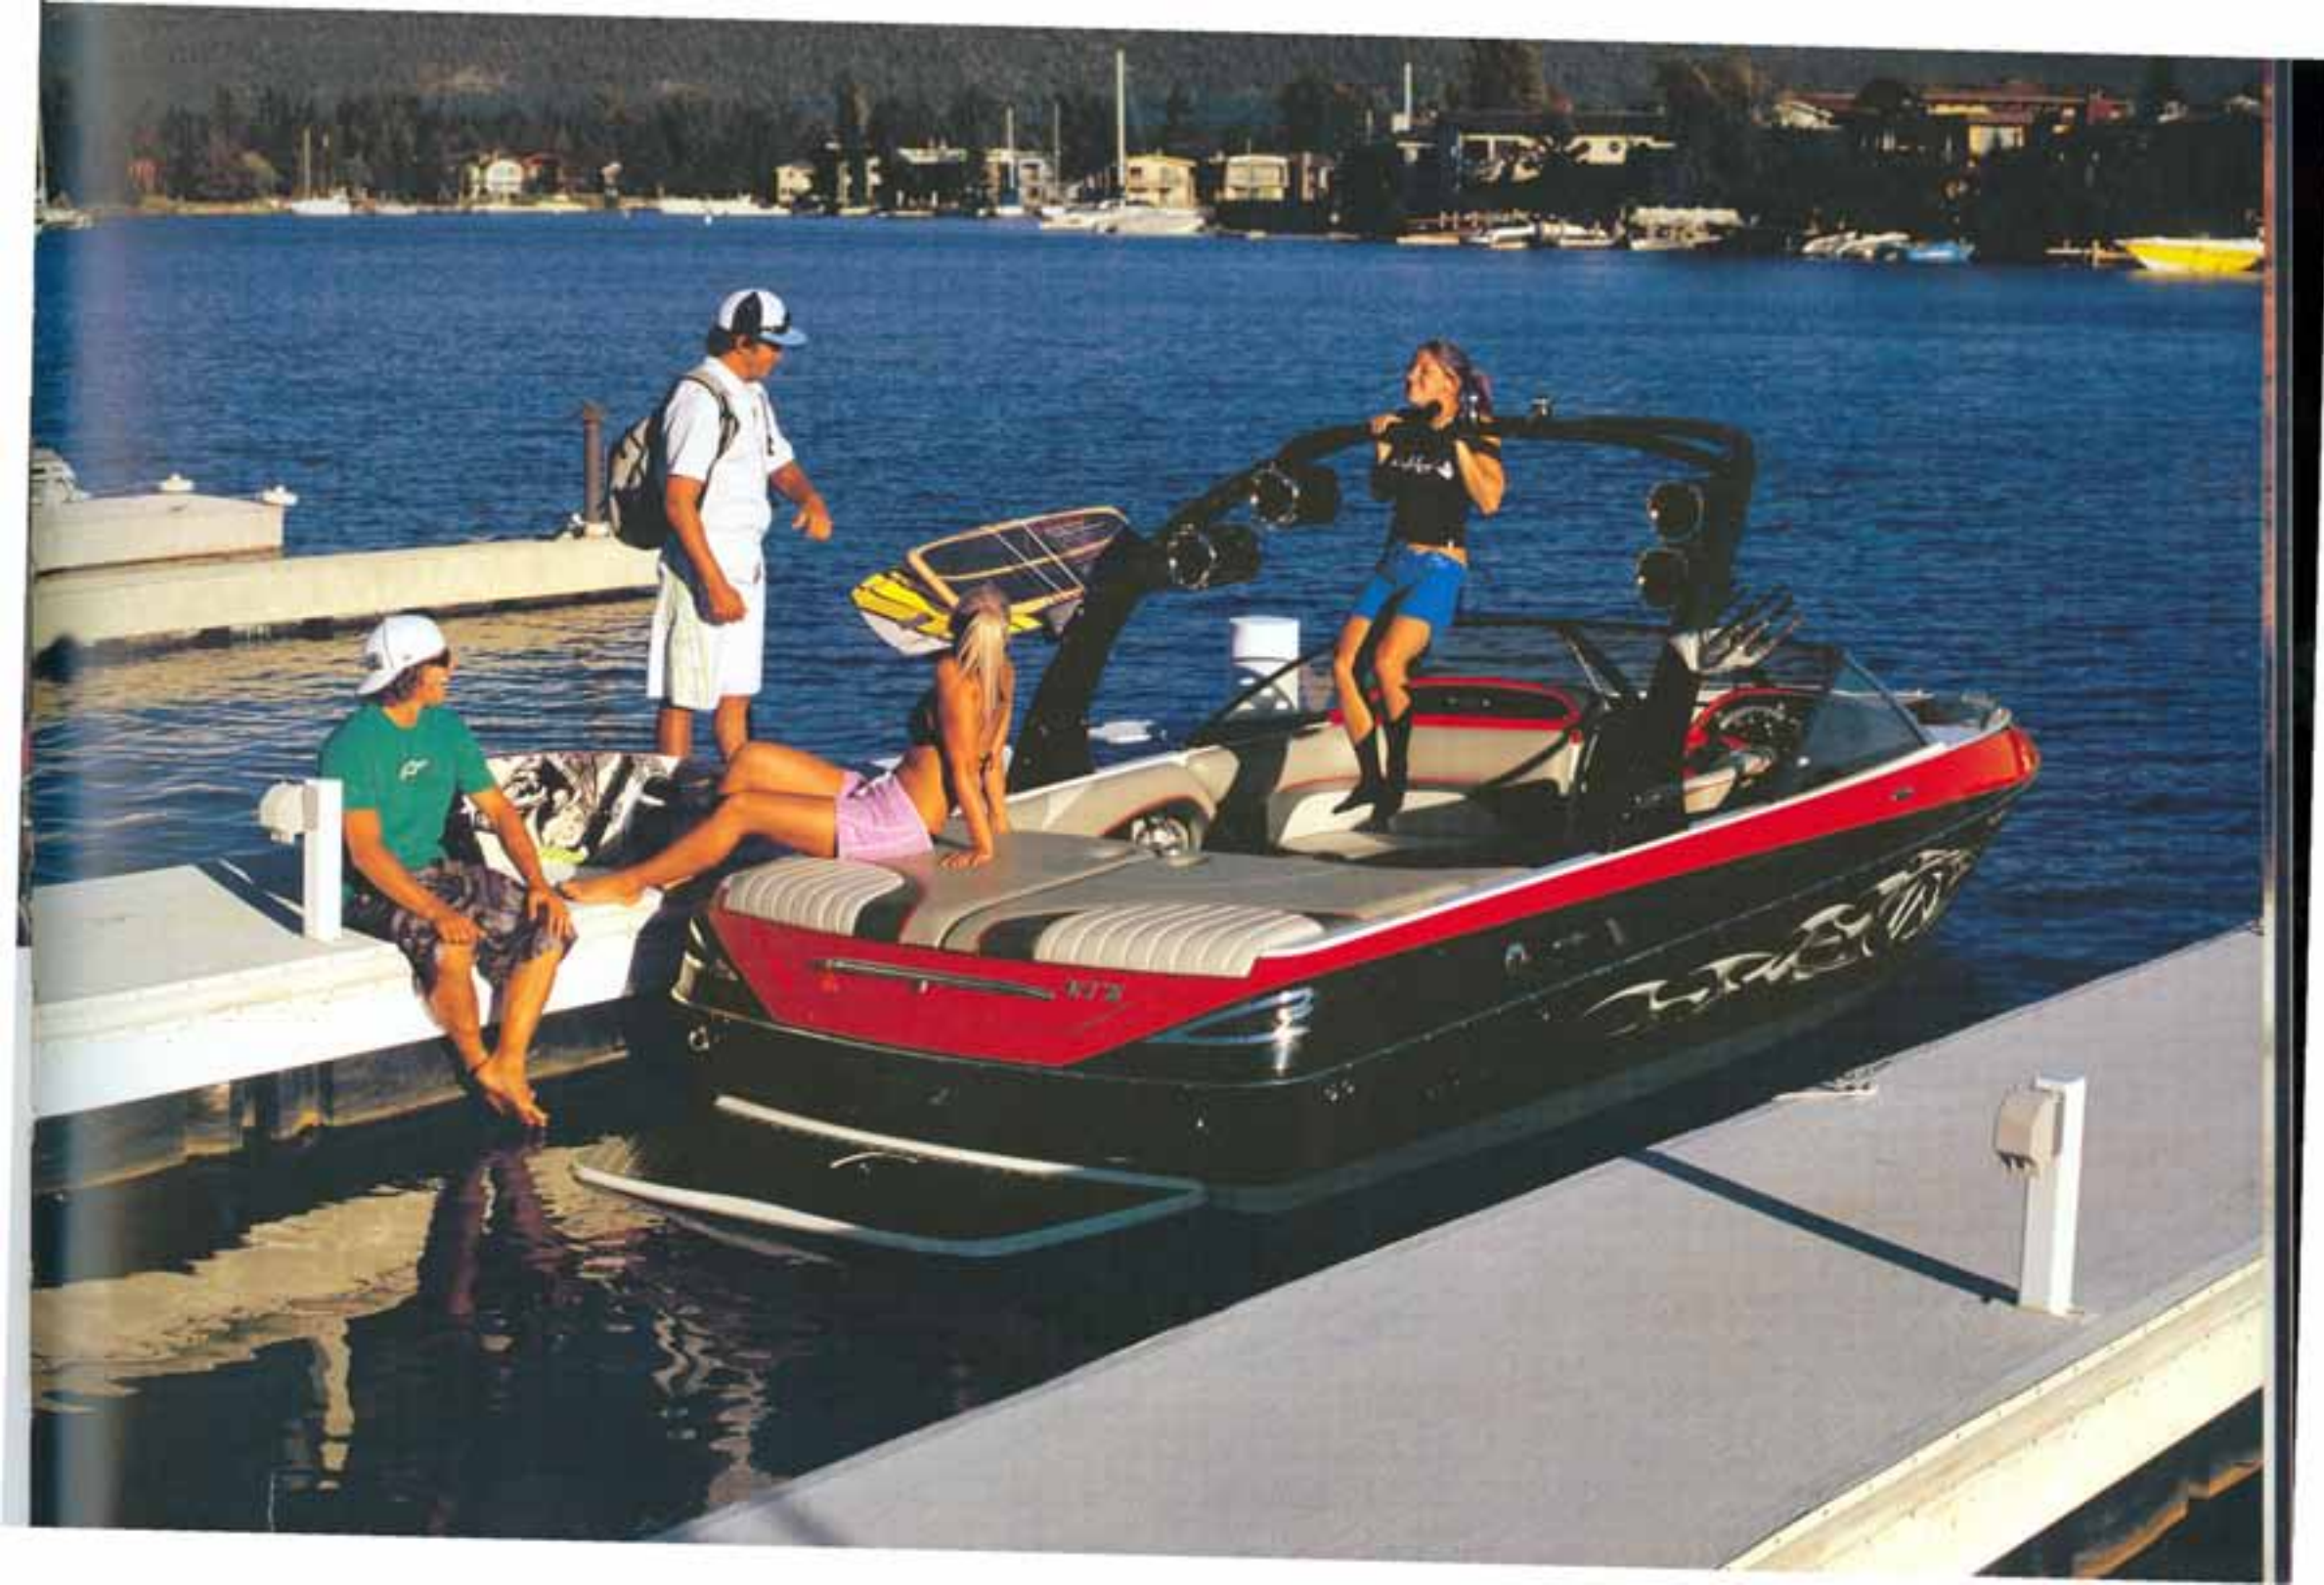

opposite page: Half Blue, Regal Half Man, Ebony Half Arrow, White Duck Blue, White Duck Man, Ebony (A1) Regal (A2) Ebony

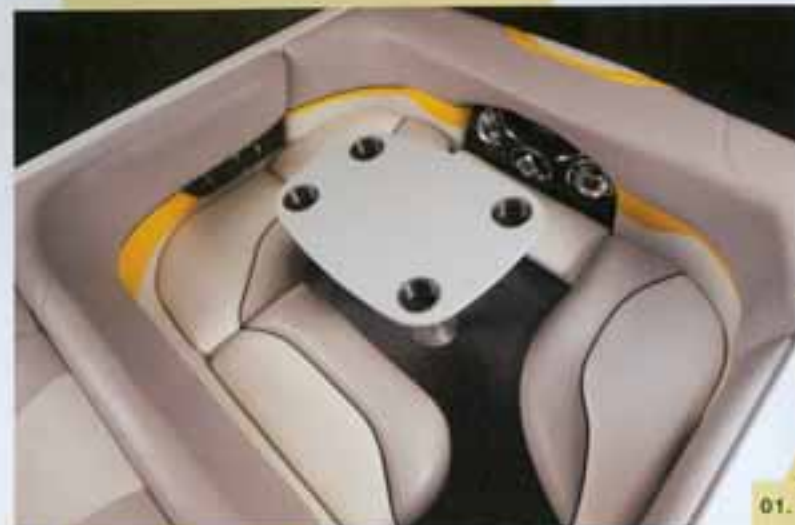

02

The inspired style of the Wakesetter VTX hits you, head on. A first look takes away your breath and by the time you catch it you will have found a host of other reasons to pause and take notice. Even more amazing is the moment you realize the characteristics that make this boat so beautiful are functional innovations. The Frameless Vented Windshield, the fierce-looking stainless steel air vents, the ergonomically oval-shaped bow rails and the engraved walk-through wind-block, all play a dual role as features in the incredible 2007 Wakesetter VTX.

It's difficult to imagine the full impact of the Wakesetter VTX interior, but thanks to this unique view it shouldn't be a problem. Take a look—drink in the sumptuous surroundings and astonishing amenities—containing your wonder will be a struggle. Malibu's talented engineers have tackled the size reduction without cramping passengers or sacrificing comfort. Every detail announces Malibu quality, from the stitching to the placement of drink holders. It truly is like stepping into a much larger boat.

Something for everyone. Built on the professional wakeboarder's hull of choice, the V25 Wake hull, the 21 XTi is an equal-opportunity pleaser. At 21.6 feet long and a beamy 8 feet wide with room for 12, it combines the best of v-drive comfort, direct-drive handling, Wakesetter style and wakeboard performance with an interior you won't want to exit. From the power of the 320 LCR multi-port fuel injected engine to the fingertip control of the electronic throttle, Precision Pro Speed Control as well as rack and pinion steering, this boat speaks volumes about quality and performance. From the three-person observer seat to the inviting bow, to the roomy wrap-around lounge, the view from inside and out is awe-inspiring.

02.

01. REAR LOUNGE & TABLE

When everyone has had their turn behind the boat and it's time to take a break, the Wakesetter 21 XTi obligingly accommodates. Just set up the rear lounge table and pull out the picnic or deal the cards. There's plenty of room and entertainment for all.

02. THE BOW

The bow of the Wakesetter 21 XTi includes a center filler cushion that makes this a choice spot for stretching out and enjoying the ride in exceptional comfort. Clearly, this is a versatile space to be used, not just a design element.

Play to win. Which comes first, the rider or the boat? You decide when you align with the pros and choose a Wakesetter VLX. The official tow boat of the World Wakeboard Championships and Wakestock, it is also the personal boat of pros Chad Sharpe, Brian Grubb and Dallas Friday. That puts you in some elite company. Can you live up to the challenge? With the optimized V25 Wake hull, the Malibu Launch System (MLS), which holds up to 1250 pounds of ballast, the possibilities are limitless for expanding your skills. Add the all-stainless Power Wedge or the redesigned traditional Wedge and see your vertical performance soar to new heights.

02.

01. SIDE ICE-CHEST

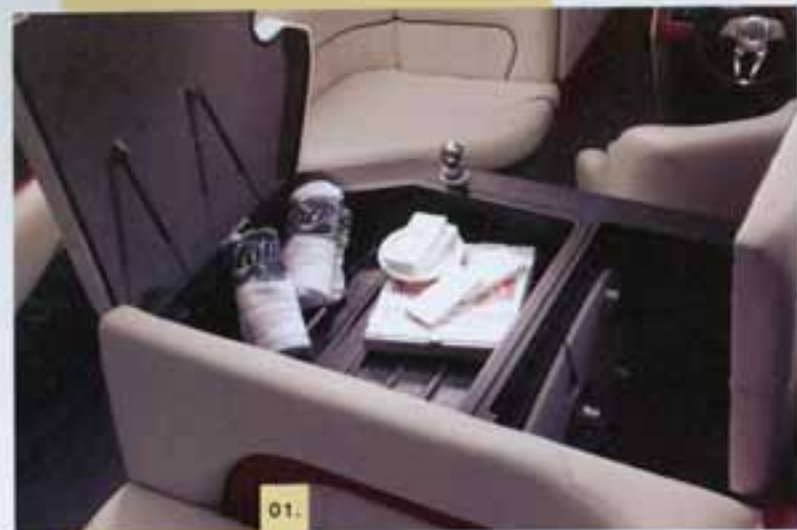

Whether you are boarding for pleasure or practicing for the tour, you can build up a powerful thirst. The Wakesetter VLX's spacious 60-quart self-draining ice chest conveniently carries your favorite refreshments in an easy-to-reach location behind the driver's seat.

02. BALLAST MONITORING SYSTEM

Ballast control is as simple as flipping a switch on the dash to deploy up to 1250 pounds. Tweak your wakes to match your skill level and adjust them as you grow your abilities. Standard features like Malibu's Ballast Monitoring System (BMS) and Precision Pro Speed Control suit varying degrees of riding prowess.

Problem solver. Direct-drive enthusiasts needed a 23-foot boat option with a comforting, wrap-around rear lounge and a functional center sundeck. Malibu engineers responded with the Wakesetter 23 XTi, a boat that has garnered two "Boat of the Year" awards of the last five Malibu wins. The midship location of the Monsoon 340, with Indmar's multi-port fuel injection and new environmentally friendly ETX/CAT Exhaust, gives the Wakesetter 23 XTi a quick, nimble performance as well as a soft, flat wake at skiing speeds. When you fill the 900 pound Malibu Launch System (MLS) and deploy an optional Wedge, this Jekyll becomes Hyde with monster ramps for wakeboarding fun.

02.

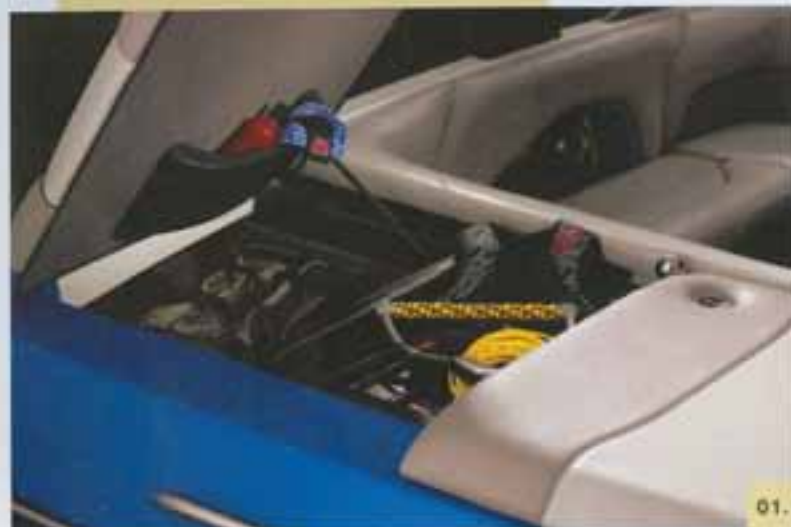

01. ABOVE AND SIDE ENGINE STORAGE
Malibu engineers created a 17 cubic foot storage area next to the engine that extends beneath the rear lounge. Skis, boards, backpacks—you name it—it will fit. For those items you want to keep warm, utilize the above engine storage. It is great for vests, towels, rash guards, gloves and the occasional hot meal. It's no wonder this Wakesetter has a following.

02. SURROUNDED BY LUXURY
The spacious interior of the Wakesetter 23 XTi is generous with its leg room and expansive in its view. Plenty of room for all your friends and their gear without crowding anyone. Three distinct seating areas are available to comfort the masses, whether the group calls for interaction, privacy or seclusion. Choose the spacious bow with removable filler cushion, the exciting helm or entertaining rear lounge for your seating enjoyment.

Teacher's pet. The Wakesetter 23 LSV is a must-have instructional tool for coaches such as World Champion wakeboarder Darin Shapiro and Team Malibu rider Gerry Nunn. Shapiro works wonders behind the Wakesetter 23 LSV at his elite wakeboard camp, Ride the Spot. Nunn tours the country with his Wakesetter 23 LSV, teaching clinics on the Just Ride tour. This is ample testimony to the boat's versatility for all levels of wakeboard performance. With 1250 pounds of customizable Malibu Launch System (MLS), Precision Pro Speed Control, Ballast Monitoring System (BMS), and the available Power Wedge, the Wakesetter 23 LSV is the perfect tool for beginners looking to attempt their first roll and professionals striving for the top.

Destined for greatness. Form is defined by function in the new Wakesetter 247 RX. Malibu engineers wrapped the award-winning 247 design around a center-mounted Hammerhead 383 engine to open the door on a host of innovations. A wakeboard thoroughbred, the hull is optimized to displace water right off the showroom floor. With 950 pounds of Malibu Launch System (MLS) available, plus the optional Wedge or Power Wedge, the 247 will pump out liquid launch ramps on demand. Two fully functional lounge areas come equipped with one removable refreshment table, an optional second table, easy-access, self-draining ice chests and a host of stainless steel cup holders. Separate or connect as you see fit in the 247 RX.

TEAM MALIBU

Wanted: Average Joe with a Malibu. They look like every man except behind a Malibu. Team Malibu athletes border on superhero to us, having contributed to the research and development for some of Malibu's most ground-breaking innovations. Pro riders Darin Shapiro, Chad Sharpe and Brian Grubb helped Malibu engineers design the Power Wedge. Skiers Drew Ross, Jason Paredes and Jill Knutson tested the new Response LXI before it was released. And the entire team has put Malibu boats to the test in some of the most prestigious events and clinics in the World. We don't wait for water sports phenomena, we create them.

MALIBU BOATS PRODUCTION PHOTOS

Family: Zander Family

Boat: Sunscape 21LSV

Dealer: Wizard Lake Marine, Alberta, Canada

THE BIG EVENT

Even before you take ownership of your Malibu, it is stamped with your name and acquires its own unique identity. The Malibu Factory Team treats it accordingly. Some new owners visit the factory while their boat is being built, others request a photo journal of the process. Whichever you choose, you will be embraced by the Malibu Family.

GENE & SUE HUKKANEN

The Hukkanen Family enjoys waterskiing and taking vacations with their Malibu Response LXI. They are often joined by their children and grandchildren. Their favorite boating destinations are Shasta or Trinity Lakes.

ISPEC - Our 2007 boat building program, iSpec, lets you choose your colors, decals and accessories then see your choices in a three dimensional-looking image. iSpec offers multiple interior and exterior views as well as printing and e-mail options. Once you have created your Malibu boat, just send your specifications to your nearest Malibu dealer for an exact quote. We believe the boat buying process should be as fun as ownership itself.

YOU ARE MALIBU BOATS

We wouldn't be who we are without you, so when you purchase a boat of Malibu's caliber, your investment buys more than a precision water sports vessel. It's not just about the transferable limited lifetime warranty, the three-year bow-to-stern warranty on all parts and labor, and the results of our award winning engineering, design and craftsmanship. We post your stories and photos on malibuboats.com and in the Malibu Review, because that's what we do for family.

VRIDE SWEEPSTAKES (OPPOSITE PAGE)

Who would believe that \$80 in donations to the American Cancer Society could translate into a 2006 Malibu vRide? Well Daniel Merrick and his fiancée Miranda definitely believe. It happened to them. And their \$80 dollar donation joined more than \$95,000 in the total money raised during the 2006 Malibu Boats vRide Relay for Life Sweepstakes.

CLUB MALIBU

There is a strong connection among Malibu boat owners, and Club Malibu fosters those relationships with special owners' events and VIP treatment at select Malibu events like the Malibu Open. Club Malibu members will receive a membership kit full of exclusive merchandise. Visit www.malibuboats.com for more information.

01. "Grunge" Exterior Graphics. This "Schoolyard" style decal package incorporates model designations and boat lengths in its design for a bold Malibu statement.

02. Titan Series III Tower. Titan's latest design accentuates Malibu's boat lines with the use of bends and angles in unparalleled 2-1/4" steel tubing. Convenient breakdown, unparalleled stability and strength in design remain its trademark. The Titan Series III is available with a built-in navigation light and optional racks, lights, speakers and a bimini.

03. Rockford Fosgate Full-Range Power Speakers. The T162C is 6.5" 2-Way Full-Range Power Speakers from Rockford Fosgate. RF is infusing Malibu interiors with premium sound, exclusively. These shimmering speakers dump crisp highs and solid mids into the Malibu line.

04. Rockford Fosgate Punch® Amp. The P450.4 is a 450 Watt 4-Channel Amplifier. It is an excellent amplifier choice for any Malibu boat and it is made available through an exclusive contract with Rockford Fosgate. Put some Punch® in your Malibu.

05. Rockford Fosgate 10" Punch® Subwoofer. The P210S4 is a 10" Punch® P2 4-ohm SVC subwoofer. Rockford Fosgate has always been known for PUNCHED up bass and now it is available in Malibu boats, exclusively.

06. Illusion X Tower. The Illusion X's forward sweep design and sleek look complement Malibu's body lines and eliminates the common box design. Standard on all Wakesetter and Ride Series models, the Malibu Illusion X is equipped with a built-in navigation light and may be fitted with swing-away racks, tower speakers, lights, and/or a bimini.

07. Pull-up Cleat. Malibu branded custom pull-up cleats are available for any Malibu boat to provide convenient tie down locations.

08. The Wedge. Exclusive hydrofoil technology turns any Malibu boat into a wakeboarding machine. The Wedge has been completely redesigned for 2007 and taken "a step beyond" with effortless operation, superior handling and welded stainless steel construction.

09. Launch Seats. Add additional seating to your inboard boat with Malibu Launch Seats placed on either side of the motorbox.

10. Driver's Seat Heater. Keep the driver warm and comfortable with an exclusive driver's seat heater. Available on all models.

11. Carpet Saver. Maintain the beauty of your boat's carpeting by installing a Malibu Carpet Saver custom fit for most Malibu boats. Colors available in Suede or Sterling. Available on all models.

12. Chromed Billet Glove Box Door. Our new billet glove box door is machined from a solid piece of aluminum, then chromed. Optional on all 21.5 and 247 models, it is a shining demonstration of the level of refinement to which Malibu has ascended with the 2007 model line up.

01. 03.

02. 04.

05. 07.

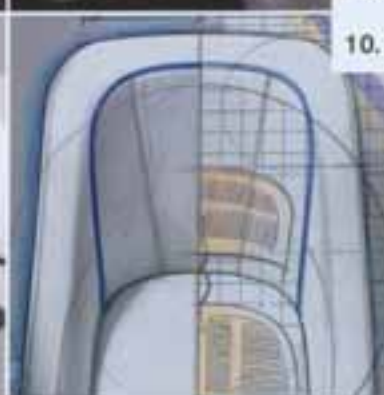

06. 08.

09. 11.

10. 12.

13. Extreme/Malibu Wheel. Stand out from the pack and enhance your rig's package with custom billet rims available on Extreme trailers.

14. Fiberglass Swim Step. Malibu fiberglass swim platforms have been designed with a slight rocker to accommodate wakeboard and ski fins and to eliminate maintenance associated with wood platforms. Available on all models.

15. Docking Lights. Add halogen docking lights to your Malibu for safer maneuvering around docks and when trailering. Docking lights are not available on Response Series boats.

16. Oversized Stainless Steel Cup Holders. Malibu's stainless steel cup holders can add more glimmering points of interest to any Malibu boat interior. And this beauty is functional. Standard on the Wakesetter and Luxury Sport-V Series as well as the Response LXi, these cup holders are built to withstand the rigors of marine use and they are easy to keep clean.

17. Power Wedge. The 2007 Power Wedge benefits from a uni-foil design and is constructed out of precisely welded stainless steel along with the mounting hood which sports a laser-cut Malibu Sun logo. Commanded by a switch at the dash, the Power Wedge can generate anywhere from 400 to 1200 pounds of displacement and change the shape of the wake anywhere along the way. Foil position is monitored by a gauge in the dash.

18. STE Exhaust Tips. All of the performance and the stainless steel look without the noise. STE Exhaust Tips are built with specially designed baffles to reduce engine noise without any degradation in performance.

19. Dual Captain's Seats. Malibu is offering dual captains' seats in the Wakesetter or Sunscape 247 LSV. Why should the driver have all the fun?

20. Revolution Wakeboard Rack. Styled exclusively for Malibu Boats' Illusion X tower, subjected to 100,000 cycles of testing under load, with a patent pending bungee system at its core to secure your boards, it is the most rigorously tested board rack on the market.

21. Underwater Lights. Cast a little glow on that late night swim or just turn a few more heads when you opt for Malibu's new bright white LEDs, mounted on the transom beneath the swimstep.

22. "Core" Exterior Graphics. This new optional decal package speaks to the Wakesetter purist with a drip-mold design and a 3D-looking grid background that simply displays the word "Wakesetter". Enough said.

23. Sony Stereo. The detachable face Sony MEX-1GP accommodates CDs as well as 1 gigabyte of digital music. Sony has built 1 gig of memory into the face plate which houses approximately 500 songs or as much as 32 hours of music. That is a long day on the lake. The MEX-1GP comes with a USB cable and is Satellite Radio ready.

24. Pop-Up Bow Light. Add a Pop Up Bow Light to your Malibu boat for safer maneuvering.

THANK YOU

Building a brochure is like building relationships. The initial idea is merely to say, it is the team work and follow-through that brings the project to life. We would not have this beautiful book without the contribution of the following organizations and individuals:

Burton & Baker
Lee King Photography
Lutz Photography
Flaxman Design
Tadpole
Lillian Pearl Marley
Honey Studios
Lulu Dan Peltre Associates
Lulu Dan Peltre Associates

Your Malibu dealer has up to date information on new colors and styles that often are introduced during the model year. Your Malibu dealer can provide a complete list of standard and optional equipment and colors. Specifications are subject to change without notice. Weights and volumes are estimates, and can vary from boat to boat due to equipment variations. **BOATING SAFETY:** Please remember to boat responsibly and respect the rights of others.

Please remember to never drink and drive.

Ride XTi

v-drive style comfort in a direct-drive configuration. The layout enables the Ride XTi to comfortably host as many as four adults in the rear lounge and invites even more with its huge mid-ship sundeck. The 14 square foot sun pad houses the 320 horse power multi-port fuel injected LCR engine while providing a perfect resting place for sun worshippers not far from the conversations of the rear lounge or the helm area.

02. ENGINE SIDE STORAGE

Using limiting tradition as a springboard for innovation, Malibu engineers have become masterful space planners. The Ride XTi, for example, negates the intrusion of the center-mounted engine through efficient use of the space around it. The large storage enclosure located behind the driver's seat secures items that would be in the way in a typical direct-drive.

Hull Design
SV23 Wake

Any passion. Any budget. From big juicy wakes for boarding to flat wakes at skiing speed, the XTi responds to your every whim. Its versatility has been noted, as it was rated 9 out of 10 in the "Multisport" category of the 2006 *WaterSki Magazine* boat tests—better than any other boat in this category. V-drive seating in a direct-drive configuration creates ample interior space, while ingenious storage design, such as the engine side storage, sub-lounge storage and netted storage along the passenger side gunwale, corral unruly gear.
